Do You Believe In "Double Indemnity"
Insurance people tell us that there is rarely a life policy written that does not contain the "double indemnity" clause. This, of course, means that in the event of accident the insured is guaranteed double the face value of his policy.

When you have your prescription filled by a Registered Pharmacist, you receive "double indemnity" on your medication. The Physician prescribes the required dose needed in your particular case and the Pharmacist carefully checks this dosage to doubly insure you against any possible medication error.
