"I wish to take this opportunity to thank all of those people who participated in the polio feeding program held at the four feeding stations on Sunday, November 15. You were splendid in your unselfish cooperation in a most worthwhile undertaking. There were many people involved in communications not only in our county but in the entire nine county district. Upon them rests much of the success for the very smooth distribution of the vaccine county and district wide and I wish to express my own appreciation and that of the First Medical District for an important job well done.

Dr. Brinn also commended Dr. John P. Weeks of Elizabeth City, for his work as coordinator of the campaign from Polio Central in Elizabeth City. "Our entire operation went off without a hitch," Dr. Brinn said.

A total of 46,239 doses of Sabin Oral Polio Vaccine was given in the nine county area during the first Sunday. It was dispensed to citizens from 39 clinic locations, mostly in the public schools.

He called attention to the projects sponsored by the Association such as the annual farm credit conference, the two-week school at North Carolina State for 150 young farm leaders from every section of North Carolina. These scholarships have totaled over 1,400, all expenses being paid by their hometown banks. Another project is the land judging contest in the interest of soil conservation.

Meanwhile, the banks of North Carolina continue to lend more money to farmers than any other institutional group of lenders.

Dec. 31 Deadline For Wool Payment

Growers are reminded to complete all details of marketing wool and lambs not later than December 31, 1964, in order to receive payments for the current marketing year.

George Bellmon, Perquimans County ASCS office manager, points out that marketings completed after that date will be eligible for payments for the 1965 marketing year. Since the wool marketing year now is on a calendar-year basis, the sale will not be considered as taking place in the 1964 marketing year if any part of a sale of lambs or wool is not settled by December 31.

This means that all the information needed to complete the sales documents and show the net sales proceeds for wool has to be determined and available by December 31 in order to be eligible for wool program payments for the 1964 marketing year. Under program regulations, wool is not marketed until title has passed to the buyer, the wool has been delivered to the buyer either physically or through documents which transfer control to the buyer, and all the information—such as price per pound, weight, yield, etc.—needed to determine the buyer's total purchase price is available.

Payments for the 1964 marketing year will begin about April of next year, after the program payment rates are determined, based on the average prices received by producers for shorn wool in 1964. Payments for the 1965 marketing year on marketings taking place or completed after December 31, 1964, will be made in the spring of 1966.

Wool producers may file applications for payment for the 1964 marketing year with ASCS county office any time between now and the end of January, 1965.

For small farms from which allotments are not released for the 1965 crop, the domestic allotment will be the smaller of (a) 15 acres, or (b) the 1965 effective allotment. For most other farms, the domestic allotment will be 65 per cent of the 1965 effective farm allotment.

If marketing quotas are approved for 1965-crop upland cotton in the December 15 referendum, growers who participate in the 1965 domestic allotment program will be eligible for price-support payments in addition to the basic cotton loans.

This payment will be based on the normal yield of the cotton acreage planted for harvest. It will help compensate farmers for reducing production and sales by taking part in the program.
