Truckers Give County Salute

Perquimans County was saluted "by the numbers" when the North Carolina Motor Carriers Association released today their new county industrial fact booklets.

Research covering pertinent facts was developed on each of the 100 counties of North Carolina. It was compiled into a total of 78,000 booklets published free by NCMCA.

Basic facts in Perquimans include: Population, 9,000; land area, 261 (sq. mi.); households, 2,400; effective buying income, \$9,749,000; retail sales, \$8,228,000; farm income, \$8,980,077; wholesale sales, \$6,221,000; median family income, \$2,370; travel expenditures, \$491,000; employment, 2,823; highway miles, 308.8; motor vehicle registrations, (autos) 2,534, (trucks) 926, and trucking employment 723; taxes and wages, \$2,933,009.

The booklets are being distributed to local county commissioners, mayors, chambers of commerce, merchants associations, industrial development groups and government leaders.

In announcing the booklet, a first in the Nation, J. T. Outlaw, executive vice president of NCMCA said, "It is our pleasure to serve you and your community in this new industrial development technique — We hope we have served you well."

"We sincerely hope the business and industrial development leaders and groups may utilize this fact booklet in the further promotion of industrial development throughout North Carolina's 100 counties," Outlaw stated.

Space is provided in the booklets on the even pages, which may be used for local area pictures, letters and/or area development information. This would be compiled locally before submitting to prospective industrial development clients for their perusal.

The back cover is also left nearly blank in order that it might be imprinted with the name of a local group or development association, chamber of commerce, merchants association, etc. The officers' names or committees specializing in certain industrial fields might also be added. In this way it can be tailored for each county booklet need in each community for local industrial development.
