

ASCS NEWS

Secretary of Agriculture Orville L. Freeman announces 1968 voluntary feed grain program that takes vigorous action to reduce total supplies in order to

strengthen prices. The target is to divert about 30 million acres from production in order to change this year's 3 to 3 per cent overproduction to 2 to 3 per cent underproduction next year. National average price support loan levels under the 1968 program will be at the 1967 level: for corn, \$1.05 per bushel; sorghum, \$1.61 per hundredweight. Price support payments will continue at 30 cents per bushel for corn and 55 cents per hundredweight for sorghum, based on planted acreage up to one-half of the farm base times projected yield. Other key provisions of the 1968 feed grain program are:

1. Required acreage diversion to conserving use to quality

price support loans and payments is continued at 80 per cent of a farmer's base acreage of corn and sorghum. No diversion payment will be made for this minimum diversion, except for small farm acreages--the same as in 1966 and 1967. 2. Additional acreage diversion will be possible up to a total of 80 per cent of the base or 85 acres, whichever is larger, the same as in 1966. The acreage diversion payment rate will be at 45 per cent of the total price support times the projected yield. 3. Exceptions were made for small farm diversion payments, both in 1967 and 1968, and the similar exception will be continued in 1968. A farm with a base of 25 acres or less will get

payment on the first 20 percent acreage diversion at 20 percent of the total support rate times yield, and at the regular 45 percent payment rate on the remaining acreage diverted to a conserving use. As in 1967, producers with corn-sorghum base acreages up to 125 acres and still be eligible for the small farm provision on condition that no corn or grain in sorghum will be planted for harvest on the farm and the 25 acres are diverted to conserving use. Whether soybean plantings can be made on corn-sorghum acreage as in 1967 without loss of the feed grain price support payments, will be announced after the domestic and export situations for this crop are more fully developed.

The Pilgrims enjoyed eating heath hens, which became extinct in 1932.

Homecoming activities occupied most of the students' and teachers' time last week. There were floats and floats to be made; problems to be solved. As usual, though when Friday, November 3 arrived, the floats were completed and everyone was looking forward to the biggest homecoming ever.

The Letter Club was in charge of the parade held Friday afternoon. The senior class led the procession followed by the Marching Unit, floats, and Homecoming Queen candidates. Preceding the big homecoming game, the Marching Unit Parents support the club, Friday night, our Indians

Page 3—The Perquimans Weekly, Hertford, N. C., Thursday, November 8, 1967. The Health Careers Club win first place in the division of floats. The Letter Club float placed second and the FHA and FFA float placed third. After the game, the cheer-
