Bowman Gray Surgeons Do 3rd Reimplantation

WINSTON - SALEM, N.C. team of Bowman Gray School of Medicine surgeons have performed their third hand-reimplantation operation at the medical center.
The latest operation took place

Aug. 16 when the surgical team rejoined a furniture worker's hand which had been cut orr in power saw accident.

Minnis H. Shetley 27, operating a trim saw in a High Point plant when the accident occurred, severing his hand at mid-forearm (about five inches above the wrist).

The hand was brought to the nospital in a bucket of ice, which kept the tissues of the hand from dying. The rejoining operation required six hours.

A spokesman for the surgical team said it was too early to tell if the operation will be successful, Problems which could occur include the development of a clot in the arteries, infection in the rejoined area or a failure of the nerves to regenerate.

Two other hand reimplantabeen successful. The first successful hand operation of this type in the United States was done at the medical center June 14, 1965. The second operation took place last November.

cept.

The card program to be utiliznot been determined although it is likely one of the major national credit card systems with international connections will be selected. One of the major advantages

of the association to individual card holders will be the use of the card with any participating merchant in three states, the nation and the world immediately. Atlantic Bankcard will affiliate with the Interbank organization for national and international servicing.

Through participation in Atlantic banks in the three states will be in a position to offer credit card services to their customers regardless of the banks' sizes. Such an association will enable smaller and intermediate-sized banking firms ready access to a total and complete credit card with a minimum of investment and operational expense,

According to statistical surveys, the high cost of entering the credit card field precludes many smaller banks from offering the credit card service to its customers whereas the consortium concept enables banks of any size to render excellent services at a reasonable and practical cost,
