Your home for modern gas appliances - cooking - heating - water heating

IF YOUR HOME HAS ELECTRICITY, YOU ALREADY HAVE THE BETTER PART OF A NEW HEATING SYSTEM.

With some outdated heating systems, you need a lot of equipment. And a place to store the fuel. A pipe to carry off the smoke. And some way of releasing the heat through your house in a pre-set pattern.

But with modern electric heating, you already have the better part of the system

installed. No fuel storage or pipes, either. Because all you need is a trim electric baseboard heater in each room. And that means room-by-room temperature control.

Move up to clean, economical electric heat.

Just call your Vepco Authorized Comfort Conditioning Contractor. He's in the Yellow Pages under "Heating Contractors." He'll recommend the best electric heating system for your home. And give you a detailed estimate at no cost.

Or if you prefer, call your nearest Vepco office.
