Is it too late for good weed control in corn? Not yet.

You can still apply the No. 1 weed killer, AAtrex® herbicide. It gets almost all the grass and broadleaf weeds in corn - if you spray before they're 1 1/2" high.

So, don't give in to a weedy corn field. There's still time to spray AAtrex. We'll give you all the information you need on this post-emergence application of the herbicide that is safe to your corn.
