Academy Defeated By Halifax 38-8

In Roanoke Rapids Saturday afternoon, Albemarle Academy dropped a 38-8 decision to Halifax Academy. The Colts, still looking for their first victory of 1973, could not contain Halifax's sensational freshman speedster Ricky Davis.

Young Davis recorded four touchdowns: a 61 yard punt return, a 32 yard scamper, a 98 yard run, and a 14 yard dash. Davis was halted only twice at the line by the Colt defense; thus in nine carries Davis had gained 222 yards. Davis had several fine runs nullified by penalties of which Halifax had 139 yards to only 22 against Albemarle.

The Colts, who made two more first downs than the Vikings, could not sustain drives due to their own errors. Twice Albemarle was inside the ten and didn't score. But in the third period, Dillard Smithson put

Albemarle on the board with a quarterback keeper from one yard. Freshman Patrick Nash added the two extra points on a run. Nash was the leading rusher for Albemarle. Smithson hit on five of 17 passes for 54 yards, but four times the ball was dropped by the receiver. Gary Cartwright came out of the backfield to catch two passes for 36 yards. Tight end Stevie Gregory pulled down two passes for 11 yards. And Nash had one reception for seven yards.

Defensively, junior co-captain Johnnie Rowe turned in his best performance with eight tackles and eight more assists. Freshmen Kevin Old and David Rots, and junior James Norroll each were in on ten or more tackles. These four men formed a solid middle which granted very few yards; Halifax did hurt the Colts on sweeps.

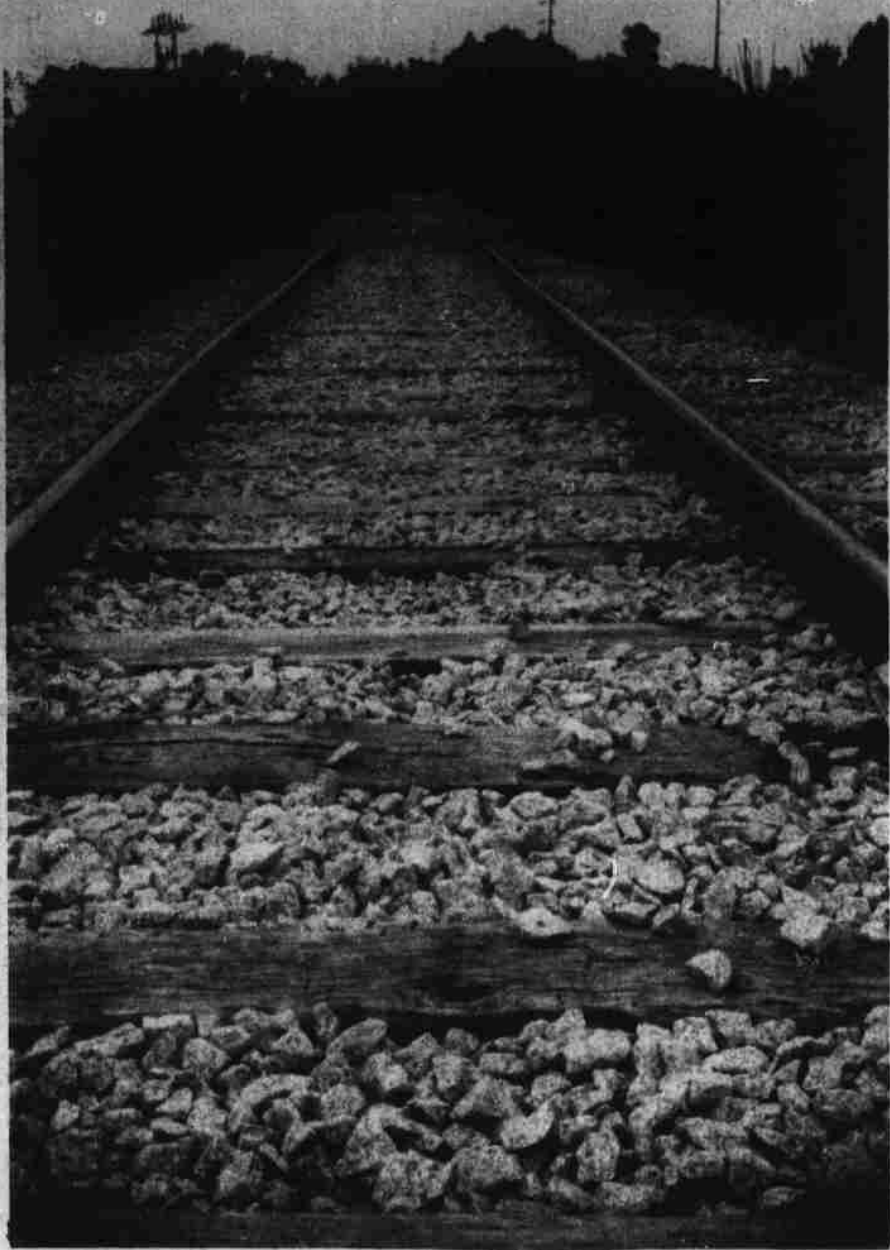

Wynn Fork 4-H News

The Wynn Fork 4-H Club met September 10 at the Hertford Grammar School. Lynn Hurdie Vice President called the meeting to order. The pledge to the American and 4-H Flags were said. Joanne Meads, Secretary called the roll with 15 members present and read the minutes of the last meeting.

New business was that record books are due by September 28 and plans are to have an Exhibit at the Six County Fair. Mrs. Frank Roberts attended the meeting as a guest and will be helping with the group.

September being Better Breakfast Month, Mrs. Earline White encouraged the group to make a habit of eating something for breakfast. She also stressed the importance of eating a good breakfast. Food models were shown of some good breakfast ideas. With no further business, the meeting was adjourned.

KEEP ON TRACKIN'—The tracks keep on as if they never end. This photo, taken out in Perquimans County, show the continuous line of the railroad track. Who knows how many track tramps once caught a ride from a train traveling these very tracks? (Marren Photo)

Farmers: Stewards Of Soil

Farmers are still the stewards of the soil and as such have a concern for its care and use, unmatched by any of the new breed of environmentalists. Farmers understand the biological phenomena much better than the ecologists.

Farmers have been strip cropping, contour plowing, using winter cover crops, maintaining windbreaks, damming up gullies and generally protecting the land before today's generation of environmentalists were born.

However, the conflicts that really disturb farmers today are the stream of regulatory measures with

little or no substantiating evidence to warrant them. Farmers will try to adapt to reasonable regulations, given time for adequate alternatives to be developed.

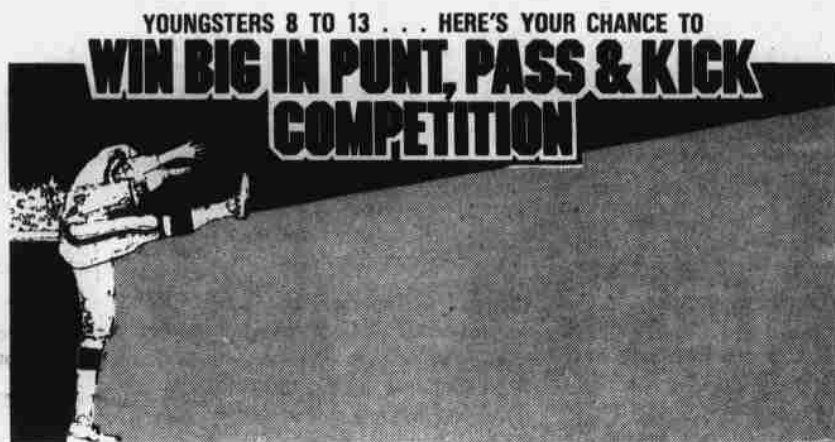

If a presently used practice or chemical were outlawed before an economic alternative is developed, production would undoubtedly suffer and prices would increase.

The cost of the changes are going to be borne by the consumers eventually. The benefits of most technological improvements in food production have been quickly passed on to the consumer, and likewise, the

costs of mandated changes will get the same pass-through.

Heretofore, the non-agricultural segment of our society has implied that farmers have done a great disservice to mankind by the use of their technological discoveries and advancements; that our fertilizers, herbicides, pesticides and machinery, our irrigators, manure applicators, etc. are all upsetting the balance of nature.

However, to deny the use of such practices, without expecting a reduction in food supplies and higher prices, is absurd.
