Edward L. Powell, commissioner of motor vehicles, of Raleigh reminded North Carolina motorists that the upcoming July Fourth Holiday is one of the most dangerous of the year on our streets and highways. The official three-day period for recording traffic collisions, deaths and injuries begin at 6 p.m. on July 2 and ends midnight July 5, 1974. Powell said speeding and drinking drivers contribute to over half of the fatalities that occurred over the 1973 July fourth weekend. He added, "Make this long holiday weekend an enjoyable and meaningful one to all motorists. Commit yourself to a safe driving attitude, and have a safe and happy July Fourth holiday."

Mrs. Ella Fleming had lunch in a Hertford restaurant recently and hurried back to her place of employment. On her afternoon break, she discovered that she'd lost a considerable amount of money. In the meantime another patron had entered the

restaurant and found the money on the floor, which was left at the restaurant for identification by owner should they reappear. Two and a half hours later Mrs. Fleming returned to inquire about her loss which she identified to the bills. She got her money back which she could hardly believe and was deeply grateful to the finder.

R.J. Reynolds Tobacco Co. has announced it has been assigned patents for the production of smoking compositions utilizing cereal grains. Preliminary tests indicate that the compositions can be used as tobacco extenders in cigarettes and smoking tobacco. The patents cover smoking compositions obtained from milo, corn, millet, rice and wheat. The process of rendering cereal grains into smoking compositions involves expanding and shredding the materials and combining them in a smoking mixture with various amounts of tobacco and tobacco extracts.

"It is far too early to estimate the effects, if any, of this development on the company's requirements for tobacco leaf. We have said in the past, and I reiterate, that our opinion is that tobacco is a necessary ingredient for a palatable

cigarette," Hobbs said. "This process still depends upon the flavoring capabilities of tobacco and tobacco extracts."
