## Merritt Receives Degree

Marshall Merritt, Chief of the Hertford Police Department, was awarded the Associate in Applied Science Degree in the area of Police Science Technology at the 10th Annual Commencement Exercises for Beaufort County Technical Institute held Friday night at the First Baptist Church in Washington, N.C.

A total of 180 candidates for graduation received degrees in the commencement exercises.

Q. What does a life insurance company do with all the money it collects?

A. Good question. It goes into the general funds of the company to meet current expenses, which include payments to policyholders and beneficiaries, and the cost of operating the company.

The balance is added to the company's reserves, which are invested and earn money toward future benefit payments for all its policyholders. Due to the effectiveness of company investments, the price of life insurance is less now than it was 20 years ago.
