

# Belvidere native is spotlighted

Derl G. Winslow, a native of Belvidere now residing in Rooper, was recently spotlighted in the quarterly newsletter (April edition) of the Martin-Tyrrell-Washington District Health Department.

The feature read, "Former Sgt. Derl G. Winslow, U.S. Army, currently Sanitarian III in charge of Washington-Tyrrell's Environmental Health Program, is in the spotlight."

Winslow left Beaufort County where he was Sanitarian Supervisor to join Martin-Tyrrell-Washington nine years ago. After completing the Associate of Arts program at Chowan College, he continued his education at Atlantic Christian College, earning his B.A. degree. Graduate work at East Carolina University and the School of Public Health at the University of North Carolina followed.

During 1952-55, Winslow served in the Medical Corps of the U.S. Army and is justly proud of two Bronze Stars, Good Conduct medal, Army Commendations and Combat Medical Badges awarded for his service in Korea. During this period he also received extensive Emergency Medical Training in Japan, concentrating on the effects of nuclear radiation on the people and environment of Hiroshima.

Another skill Winslow can claim is associated with her

certification as a Civil Defense Radiological Monitor Instructor. He is qualified to teach small, select groups of people to teach others about fall-out and movement of radioactive fall-out.

He holds professional memberships in the National Association of Sanitarians, the North Carolina Public Health Association, and the N.E. Sanitarians Association (N.C.).

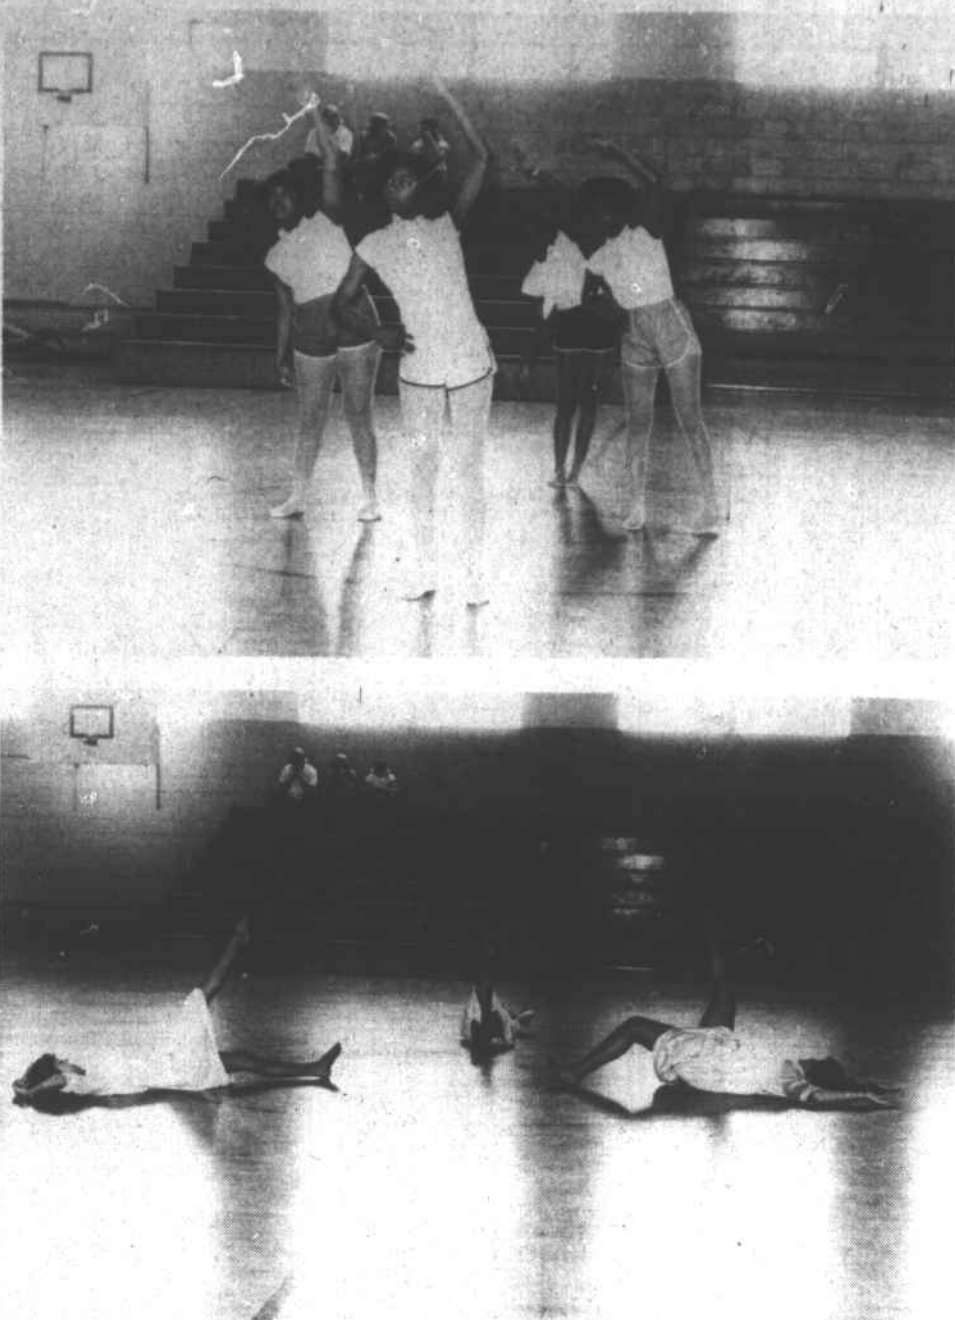

His work in Washington-Tyrrell is, principally, the grading of all food handling operations in both counties — no mean task.

The seventh in a family of eight children, Winslow is single and often enjoys golfing, the beach, fishing (strictly hook and line) and hunting, especially rabbit hunting. He spends a good deal of his spare time fishing in Perquimans County with his brothers.

We are happy to commend Winslow for his consistent and effective service to the District by "spotlighting" him in this issue of the newsletter."

### LABEL INFO

The label on a package of ground beef informs the consumer of the relative percentage of lean in the ground beef. According to Federal law, ground beef or hamburger may contain no more than 30 percent fat.

**GRACEFUL PERFORMANCE** — Ninth grade physical education students at Perquimans High School veered away from the usual running, push-up regime to perform some graceful moves in a modern dance presentation last week for school administrators and the class instructor. (Staff photos by Yvonne Baker)

# Four referenda planned

**RALEIGH** — Four agricultural commodity groups will hold promotional and research referenda April 28.

If approved, the North Carolina Cattlemen's Association will assess a 20 cents a head on marketed cattle; the Corn Growers Association of North Carolina, one-fourth cents per bushel; North Carolina Egg Marketing Association, three cents a case; and the North Carolina Pork Producers Association, five

cents a head on feeder pigs and ten cents per market hog.

Agriculture Commissioner Jim Graham has endorsed the referenda for all participating commodity groups.

"These assessments are tiny compared to the good they do in promotion of pork, eggs, cattle, and corn," the commissioner said. "The funds are used to develop new markets, new and better products and new varieties and it is done

through producer self-help."

The North Carolina Department of Agriculture collects the assessments and all funds are turned over to the organizations.

To pass, the referenda require a two-thirds favorable majority. Eligible voters are those who produce, sell or derive income from the sale of the commodities, including family members. Polling places will be established in all counties in the state.

# Contractors hold meeting

The Northeastern North Carolina Electrical Contractors Association held their April meeting at the Knobbs Creek Praks and Recreation Center with 19 members and five guests present.

Guests for the program were Bob Kloeti, systems engineer for the General Electric Company in Rich-

mond, Va., and Billy More, sales representative for the company.

Following roll call, reading and approval of minutes, correspondence and treasurer's reports, time was allotted for old and new business and any grievances.

A 15-minute break was

taken and the meeting was turned over to Kloeti and Moore for the G.E. program on industrial lighting. The program included a slide presentation after which the members were divided into two groups to tour the mobile lighting lab where a variety of industrial fixtures were on display.

## TAKING A STAND

Note: This continues a weekly series of statements where incumbent candidate Clifford Winslow will express his views on issues affecting education in Perquimans County.

CLIFFORD WINSLOW

## COMMENTS ON POLICY.

The most important task of a School Board is to formulate policy for school governance.

Policy-making is what School Board membership is all about.

No School Board can be as effective without it. Sound policy development liberates Boards from details of execution and places these details on the shoulders of the administration where they should be.

However, no policy should be so rigid that it does not speak

to the changing times in which we live.

I believe that the most important policy of all is to be willing to change existing policies when the need arises. And it's very important that Board members should know the difference between policy and administration.

One way local Board members can develop expertise in policy making has come about due to a program developed by the

six-county Alliance for Progress, Inc. This group is offering Phase II of the Rockefeller Program to local elected officials that will address problems and solutions in policy-making.

Through my experience on the Board of Education, I recognize the need for sound policy development and look forward to participating in this AFP program as a means to improve my role as a School Board member.

Next week: A final statement.

# Businesses to learn state purchasing

Small business firms in Perquimans County interested in knowing more about how to provide equipment, supplies, services or construction to state government should attend an information exchange meeting Wednesday, May 31 from 9 a.m. until noon at the Willis Building at East Carolina University in Greenville.

The meeting is the last of six being held this spring to provide small businesses with more information on

how the state purchasing program works and what the state buys.

Businesses in Perquimans County may be potential suppliers to state government if they produce or sell chemicals, road building materials, appliances, hospital supplies, food and food service equipment, school or office supplies, and many other items.

The state also has contractual needs for consultants, janitorial services,

construction and repair, exterminators, and others.

Representatives from the State Division of Purchase and Contract, the Office of State Property and Construction, and the State Office of Minority Business Enterprise will explain purchasing procedures and rules answering any existing questions. Also present at the meeting will be representatives from many local state-supported agencies.

"The exchanges are designed to answer the questions of local small business persons, to let local state agencies know what goods and services are available close at hand, and to provide opportunity for buyers and sellers to get to know each other," explained Willis Holding Jr., director of the Division of Purchase and Contract. "But potential suppliers should not expect to attend the meeting, negotiate a contract and

walk away with a purchase order from the state."

Holding added that business persons will benefit from the meetings and will learn much about the purchasing system and how to have an opportunity to bid on state services and supplies.

More information on the meeting is available from the Office of Minority Business Enterprise, (919) 733-2712.

## 4-day work week started

**RALEIGH** — North Carolina Department of Transportation (NCDOT) officials announced that as of April 17, some 7,000 state highway maintenance workers began a four-day, 10-hour work week.

This is a continuation of a program that was initially begun on a statewide basis in 1975. The 10-hour day means that maintenance crews are reporting to work at 7 a.m. and continuing to work through 5:30 p.m. with a 30-minute break for lunch. These summer work hours will remain in effect through Sept. 29.

According to M.C. Adams, Head of Maintenance Unit, previous studies conducted by the Department indicated the summer schedule is a boost to employee morale and increases productivity. The program has also been met with approval from about 93 percent of the employees. "Over a 26-week period," Adams said, "by eliminating approximately 1.36 hours of travel time per employee per week from headquarters to the job site, an additional 750,000 productive manhours would be created worth \$1.5 million in improved service value."

In announcing the summer work hours, NCDOT officials stressed that the four-day week applies to normal field maintenance operations only and will not affect any essential emergency repair services. Also, all field offices, manned by administrative personnel, will continue to operate on the normal five-day work schedule.

## Dentist completes course

Dr. Jack L. Boone, D.D.S. of Hertford, recently completed the course, "Complete Dentures," held at the Bethesda Naval Hospital in Bethesda, Md. He also recently completed a tour of active duty in Norfolk, Va.

# WE WILL GIVE AWAY A FREE AMANA REFRIGERATOR-FREEZER ON MAY 13TH.

All you have to do is come in and register—there is nothing to buy!

That's all there is to it. The drawing will take place May 13th in our showroom.

Each winner will receive a new 12.2 Cubic foot Amana Refrigerator-Freezer, free.

Like all new Amanas, these units save energy because of their superior design and engineering.

Features like more and better insulation, a liner that's one solid molded piece, and Magna-Seal Doors, save Amana owners more energy.

That means more cold per Kilowatt which makes Amana cheaper in the long run.

So visit our showroom and register. You just might win yourself the best refrigerator-freezer on the market as well as some energy savings.

# Amana

MORE COLD PER KILOWATT. CHEAPER IN THE LONG RUN!

FIRST TIME EVER! AMANA'S FACTORY AUTHORIZED SALE, APRIL 1-30!
