Helps you keep cooler in the summer ... even without air conditioning

Replaces built-up heat with built-in comfort. Soaring summer temperatures turn your attic into an oven. Stagnant, humid, trapped air can build up to temperatures as high as 130° or more and settle like a hot blanket over the living area. A Pacesetter power attic ventilator replaces super-heated air with cool outside air. Result: you help eliminate heat penetration into the living area.
