But according to treasurer for the effort, Weldon Byrum, 1,700 rolls were used, and only 30 pounds of barbecue were left. Organizers do not know how much profit was realized.

### Newbold-White

The Newbold-White House has been closed for the winter but will reopen to the public on March 1. The Perquimans County Restoration Association is pleased to announce that a spacious new visitor center at the Newbold-White House has been built, and exterior lighting has been installed in the parking area and along the walkway for safe night operation. These facilities will increase the Association's ability to mount exhibits and host special programs.

In order to staff the Newbold-White House and visitor center, it will be necessary to have at least two volunteers at the site each operating day (Monday through Saturday, 10:00 a.m. to 4:30 p.m.) beginning March 1. Since the new center is located some distance from the Newbold-White House, it will be necessary to have someone in the building at all times to supervise the gift shop and to handle ticket sales. Individuals will also be needed to lead tours.

At the present time, the Newbold-White House is still lacking enough volunteers to run the site properly and is seeking individuals who will donate their time one day a month. (Volunteers may also arrange for one-half day per month.)

A training session for those interested in volunteering for the coming season will be held at the Newbold-White visitor center on Saturday, February 25 at 1:00 p.m. If you cannot attend this session, arrangements can be made for individual instruction.

Those willing to help at the site can call the Newbold-White House during the day or evening at 426-7567, or write the Perquimans County Restoration Association at P.O. Box 103, Hertford, N.C. 27944.

### SAVE YOUR VISION WEEK

The first week of March is the 61st Anniversary of SAVE YOUR VISION WEEK, a national event. A Presidential Proclamation each year reminds the nation that vision is a priceless gift to be protected by each of us.

Regular eye examinations are the best way to protect vision. These examinations often pick up the early stages of eye diseases like glaucoma or diabetic retinopathy, diseases that can be treated to prevent vision loss. Regular eye examinations can prevent visual handicaps from impeding your child's learning. A prescription for safety lenses can prevent eye injuries in the factory or on the farm.

If you or your loved ones haven't had a complete eye examination recently, make an appointment now. It is the best way to observe SAVE YOUR VISION WEEK.
