"What are those brown spots on my hands?"

You may think they're just big freckles, or sun spots. Maybe somebody told you they were "liver spots." But they're most likely age spots.

Do you have to put up with age spots?

The answer is no. You can fade age spots with Esoterica Medicated Cream.

Esoterica works because it goes below the skin surface. Esoterica stops excess pigmentation, so the spot fades.

If you use Esoterica daily as directed, you should see a clearer, more youthful-looking skin tone in six weeks.
