Get Tires Inspected If You Want Gas

Motorists who expect to qualify for continued use of their cars after January 31 must get their tires inspected before that date, Paul M. O'Leary, deputy OPA administrator in charge of rationing, said today. Neither gasoline ration books nor tires will be issued in the future to those who do not meet the inspection deadline, the OPA official explained.

On an elapsed time basis, half the inspections should have been completed during the month.

Little Theater Guild.

Grim realism, showing how the combination of truth, circumstantial evidence and mob violence can victimize the innocent, was the central theme running through the first of the Theater Guild's three one-act plays, presented on Friday night and repeated Saturday afternoon. The play, "The Painter" written by John Ross of the Fisk university department of dramatics, was convincingly characterized by the Miss Rachel Manley of Greensboro, Edwina Schnyder, of New Orleans, La., and Fannie Lea, of Yanceyville, assisted by William Skeiton and Harry Smith of A. and T. college. HERE ARE THE LIES OF HITLER

A Short, Documented List of the More Conspicuous of His Lies

1933

February 10—Hitler speech in Berlin: "The first and best point of the government's program is that we won't lie and we won't swindle."

May 17—Hitler's speech to reichstag: "We of this young German movement are filled with deep understanding for the feelings and opinions and rightful claims to life of other nations. . . . We desire from the bottom of our hearts to live with them in peace and friendship."

"We therefore have no use for the idea of Germanization. The mentality of the past century which made our rulers believe that they could make Germans out of Poles and Frenchmen is completely foreign to us."

"Germany, France and Poland will continue to exist. Germany wants nothing that she is not ready to give to others. The German people have no thought of invading any country."

October 14—Hitler's proclamation announcing Germany's withdrawal from the league of nations:

"The national cabinet . . . disavows violence as an unsuitable means for settling differences with the European community of states."

October 14—Hitler radio address:

U. S. Will Have Healthy Economy

The following statement was issued today jointly by the war production board, the war department and the navy department:

The United States is entering the new year with a revised, integrated war production program geared to make the military and civilian supplies necessary for the ultimate victory.

While providing for a lean, but sound and healthy civilian economy, the program for 1943 anticipates munitions production double that of 1942. Great importance in the strategic plans for this year is placed on aircraft, merchant shipping and naval escort and combat vessels. The program has been adjusted as a means of insuring the production of these items far above the rate achieved last year. It provides, for instance, for:

About twice the number and about four times the weight of planes built in 1942, with emphasis continued on bombers designed to carry the maximum destruction to the enemy fighting forces and industrial centers.
