

# Coast Guard Announces Dates For Entrance Exams

Annual competition for entrance to the U. S. Coast Guard Academy will begin with the administration of the College Entrance Examination Board tests on December 2, 1967. These tests will be given in over 3,000 test centers, located throughout the country. Arrangements to take these examinations should be made by the applicant through his high school prior to October 28. In addition, he must complete the Coast Guard's application forms and return them before the 15th of December.

Local high school guidance counselors have placed heavy emphasis on the opportunity offered qualified young men: a top-flight college education with a bachelor of science degree, and a commission as an Ensign in the Coast Guard following graduation.

Appointments are made only on a competitive basis; there are no separate quotas for states or districts and no special categories. All qualified young men, interested in applying for admission to the Coast Guard Academy should write for details and application forms to the Director of Admissions, U. S. Coast Guard Academy, New London, Connecticut 06320.

A candidate for the forthcoming competition must have reached his seventeenth but not his twenty-second birthday by July 1, 1968, and must be in excellent physical condition.

The minimum educational requirement is a high school diploma, however, high school seniors assured of graduation by June 30, 1968, are eligible to compete, provided they have at least 15 credits by that time. Applicants must have completed three units in English, and three in mathematics including algebra and plane or coordinate geometry or their equivalents.

### Information On The Coast Guard Academy

The Coast Guard, one of the five Armed Forces of the United States, and the nation's oldest continuous seagoing service, announces the competition for appointment to the Coast Guard Academy. The Coast Guard Academy in New London, Connecticut, educates and trains young men to become career commissioned officers in the United States Coast Guard.

The varied duties of the Coast Guard include search and rescue, enforcing marine law, operating the International Ice Patrol, manning ocean weather stations, maintaining over 39,000 aids to navigation, and generally carrying out the fundamental task of protecting life and property at sea.

Entrance to the Coast Guard Academy is achieved as a result of a nationwide competition. There are no congressional appointments as at the other academies nor are there any geographic quotas.

The next annual competition for entrance to the United States Coast Guard Academy will commence with the December 2, 1967 administration of the College Entrance Examination Board tests. The examination will be held in over 3,000 test centers in the United States

and abroad. Successful applicants will report to the Academy in June, 1968. Applicants should make application to take these tests prior to October 28, 1967.

An applicant must be a high school senior or high school graduate, and must have reached his 17th but not his 22nd birthday on July 1, 1968. An applicant still in high school must graduate and earn 15 units by June 30, 1968. These units must include three in English, three in Mathematics including Algebra and Plane or Coordinate Geometry, and seven additional units in Mathematics, English, Science, Social Studies, or foreign language. An applicant must be in excellent physical condition, between 64 and 78 inches in height, with proportionate weight, have at least 20/30 vision in each eye, correctable to 20/20, and normal color perception.

The Academy curriculum includes military training and a well-rounded course of study in engineering, the humanities, and subjects related to the professional duties of a Coast Guard officer. Extra-curricular activities include a variety of clubs and athletics. Coast Guard teams compete with many colleges in a dozen varsity sports. Coast Guard cadets spend a portion of each summer at sea, training aboard the bark EAGLE and major cutters. Cruises are made each summer, calling at several foreign ports.

Upon completion of his education at the Coast Guard Academy, a cadet is commissioned as an Ensign in the Coast Guard and awarded a Bachelor of Science Degree. After graduation officers may apply for flight training qualifying them for service as aviators in the Coast Guard. Postgraduate education is also available in many fields related to Coast Guard duties. Postgraduate courses are conducted at the advanced military schools and leading universities and colleges throughout the country.

The cost of the course of instruction is paid by the Government, and while at the Academy each cadet receives a monthly allowance. Graduates of the Academy agree to serve at least five years as commissioned officers. The career of a Coast Guard officer is a particularly rewarding one because of the essentially humanitarian nature of the Coast Guard's mission. The Coast Guard is unique among the Armed Forces in that its duties in peacetime contribute directly to the welfare of the nation.

A booklet and application forms may be obtained by writing to the Director of Admissions, U. S. Coast Guard Academy, New London, Connecticut 06320. Applications are now being accepted.

### LEWIS CARROLL

and Attorney Julius LeVonne Chambers of Charlotte.

Mr. Chambers handles more litigation in North Carolina for the LDF than any other lawyer.

This North Carolina chapter is participating in a national campaign headed by Mr. Spaulding and Dr. Percy Julian, a research chemist of Oak Park, Illinois.

This national committee seeks \$1,000,000.00 for the work of the LDF during the next year.

Gustav Henningburg, assistant to the president of the LDF, indicated that the LDF—a separate, distinct organization from the NAACP—is currently handling 29 school integration and 11 employment cases in N. C.

Other North Carolina litigation in the area of voting, peaceful protests and public accommodations suits is also being handled by the LDF's cooperating attorneys across the state.

Other charter members of the North Carolina chapter—each of whom has pledged \$1,000.00—include:

Mr. J. H. Wheeler, Durham, North Carolina; Dr. George C. Simpkins, Greensboro, North Carolina; Attorney Charles V. Bell, Charlotte, North Carolina; Dr. D. M. Clayton, III, Roxboro, North Carolina; Mr. Carl H. Russell, Sr., Winston-Salem, North Carolina; Mr. T. C. Jervay, Wilmington, North Carolina; Dr. C. Mason Quick, Fayetteville, North Carolina; Mr. Ernest A. Swann, Wilmington, North Carolina; Dr. J. S. Simmons, Sanford, North Carolina; Dr. John P. Holt, Asheville, North Carolina; Dr. P. P. Little, High Point, North Carolina; Dr. George H. Evans, Greensboro, North Carolina.

### TRIP TO ILLINOIS

Mr. Annie Mae Butler of 2115 Vale Place and her daughter, Ernestine Butler recently returned from Illinois. While vacationing in Chicago, they visited a brother, Jessie Moore, and two nieces, Geneva Watkins and Maggie Dickson. They also visited cousins and friends in LaGrange, Illinois. They had a lovely trip back home.

times, as well as with songs and dances.

David Novak, young New York author, and C. J. Kelley, composer, also from New York, have combined their talents for the production. The author and composer took as their motivation Carroll's own statement that he "wrote to entertain."

The versatile Kaleidoscope Players have toured the United States and Canada for the last six years with programs of literary works such as "Robert Frost on Stage," "The World of Carl Sandburg," "Under Milk Wood," and a special presentation of the works of Rostand called "Two by Five." They have played in all fifty states.

## POLITICAL SCIENCE STUDENT JOINS SEN. SCOTT'S STAFF

Christopher M. Roulhac, III, has joined the staff of U. S. Senator Hugh Scott (R.-Pa.) as a summer intern. He is a junior majoring in political science at Albany State College in Georgia.

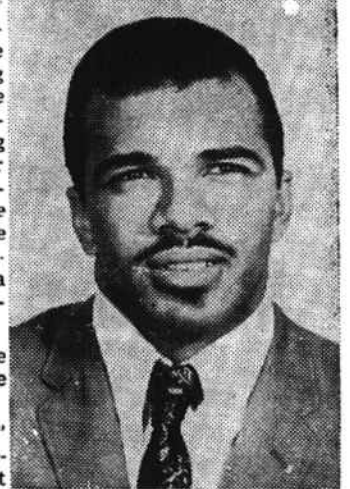

Mr. Roulhac, 20, of 7137 Lincoln Drive, Philadelphia, will assist permanent staff members with all daily office functions from legislative research to constituent service.

As an intern, Mr. Roulhac will be assigned duties in the student summer program designed to give outstanding young men and women an opportunity to expand their understanding of the United States Senate.

A 1964 graduate of Germantown (Pa.) High School, he holds many awards. Among them are the Union League Award for outstanding citizenship, and the Leopold F. Zwarg Award. He was class Senator and school government Representative. At Albany State College he was named to the Dean's List. He is an outstanding athlete and was a Y.M.C.A. summer camp counselor.

Senator Scott's staff is one of the best integrated in the Senate.

"I hire solely on merit," Senator Scott said, "and therefore I have one of the best staffs in the Nation's Capitol."

Christopher Roulhac

### TOBACCO, COTTON, PEANUT FARMERS TO VOTE JULY 18

(Continued from Page 1)

Cotton Promotion Association up to 25 cents per bale for the years 1969-1973. The funds will be used to support the cotton promotional activities of the association.

In each of the three assessment programs, farmers who do not wish to participate may receive a full refund for the amount collected from them upon request.

A "yes" vote by two-thirds of those voting will be required for the approval of each of the four issues to be voted on July 18.

### GARDEN TIME

By M. E. Gardner  
N. C. State University

Spraying or dusting to protect plants from the ravages of insect and disease pests is the best insurance you have against damage.

A good slogan: use the right materials, at the right time, properly mixed; and do a thorough job of covering all parts of the plant, especially the undersides of the leaves to control sucking insects such as aphids, red spiders and lace bugs.

All insects have a life history or cycle. That is, they undergo changes which may occur in four stages: egg, larva, pupa and adult. Or, in three stages: egg, nymph and adult. The larva and the nymph stages are usually the most destructive although the adult stage may also be destructive.

In the case of fungus diseases, it is necessary to keep the plants

protected at all times. These diseases, represented by various leaf spots of roses, apples and many other plants, produce spores. These spores germinate and attack the plant tissues. If the leaf is protected by a fungicide, the spores are killed before they have a chance to enter the tissues. Once the diseases gain entrance, they are more difficult to control.

These simple examples should serve to show how important it is to keep your plants protected at all times. Many people seem to think that one or two sprayings during the growing season are all that are necessary. On the contrary, this battle against insects and diseases is never-ending. For this reason, it is best to follow a regular spray program for all of your ornamentals, fruits and vegetables.

There are many effective spray chemicals available—some for sucking insects, others for insects that chew food and some combination materials which are effective against both types.

Mix all materials according to instructions given on the containers. This will insure proper concentration. Observe safety measures by not inhaling spray or dust, by washing hands with soap and water and by storing out of reach of children and pets. Observe residue tolerances permitted on vegetable crops by using the different chemicals as recommended.

Your county agent will have a supply of spray calendars for the different crops or can get them for you.
