

Bill Adair is a fisheries biologist.

He works for you.

Bill's main job is to make certain that fish in Duke Power's lakes are not harmed by the luke-warm water discharge from our steam electric generating stations.

The stations are designed so that the maximum temperature of discharged water is about the temperature of the human body. And this heat radiates rapidly to the atmosphere.

To check on the design and operations of the stations, we continually monitor temperatures and make biological studies of the water in our lakes.

So you'll find good fishing on Duke Power's lakes. Some of the best, in fact, is near our stations. And our scientists—like Bill Adair—are working closely with governmental and independent scientists to keep it that way.

It's just one of the many things we're doing to make this a better place to live.

Duke Power
Making life a little better
