The family will receive their friends at Smith's Funeral Home Thursday night from 8 to 9 p.m.

Smith's Funeral Directors in charge of service.

Bennett Professor To Participate In Summer Institute

Professor Nellouise D. Watkins, Coordinator of the Mathematics Division of Bennett College, will participate in the Summer Institute for Mathematics Teachers at the University of North Carolina at Chapel Hill.

The Institute centers on the study and applications of Linear Algebra and Differential Equations. Courses will be conducted by Dr. Benjamin J. Martin from Morehouse College, Atlanta, Ga. and Dr. Ancel Mewborn from UNC. Guest lecturer will be Dr. J. Ernest Wilkins of Howard University.

Professor Watkins, wife of a local physician, has taught on the college level for 14 years. She completed her undergraduate work at Wilberforce University and graduate work at Fisk University.

Her selection was based on her mathematics background and on her high potential for implementing science improvement within her Department. She is one of 31 participants out of more than 300 who applied.

L. Richardson Hospital Auxiliary Honors Miss Crosson

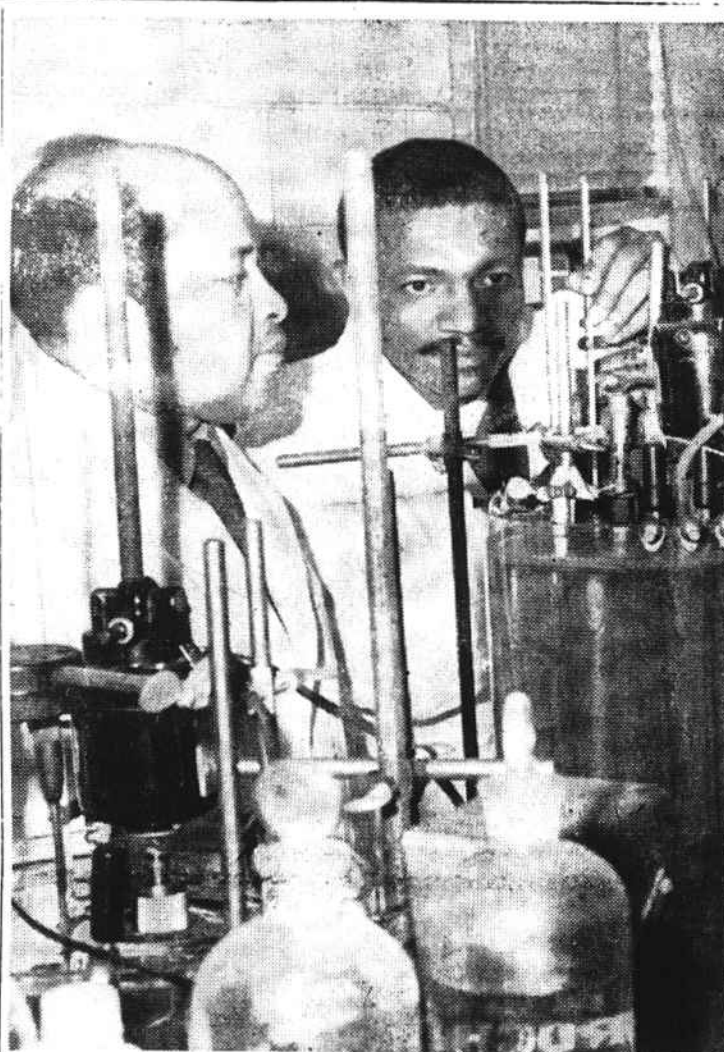

At a recent meeting of the L. Richardson Hospital Auxiliary, Miss Wilhelmina Crosson was named "Member of the Month".

Miss Crosson, former President of Palmer Institute, began her career in the oldest girls' school in Boston — the Hancock School. Here she was one of the first Negro teachers in the city of Boston.

She graduated from the Girls High School; the Salem Normal School; received her bachelor's degree from Boston Teacher's College; and her master's degree in Educational Administration from Boston University. She did further study at Harvard University, Cambridge, Massachusetts; Columbia University, New York City, and Goddard College, Plainfield, Vermont.

In 1945, Miss Crosson, through the personal interest of Dr. Carter G. Woodson, received a fellowship from the Association for Study of Negro Life and History to study and travel in Mexico. After her return to

\$426,000 FEDERAL GRANT ENABLES A&T TO DO BIOMEDICAL STUDIES

By RICHARD MOORE

A federal program, designed to tune in scientists at predominately-black colleges and universities to the nation's biomedical research efforts, has resulted in a \$426,873 grant to A&T State University.

The grant from the National Institute of Health, was announced today by Dr. Lewis C. Dowdy, president of A&T.

Dowdy called the grant "a breakthrough for the state and the nation. This project will permit scientists at predominately-black institutions to participate in biomedical research efforts, with funds which were difficult to come by in the past."

The research project will be directed by Dr. Walter Sullivan,

chairman of A&T's Department of Chemistry. Initial research projects will be conducted by Sullivan and eight other faculty members in the university's departments of chemistry, engineering and biology.

"The overall goal of this program, said Sullivan will be to develop a first rate biomedical research program at A&T. Successful completion of the program should be a stepping stone for the attraction of even greater funds for this kind of research."

Sullivan pointed out that in past years, predominately black colleges have gotten very few of the federal funds available for biomedical research.
