YARD WAR BOND DRIVE HIGHLY SUCCESSFUL

**Three-Front

And Office**

The Third War loan drive was highly successful in the yard with the employees and company purchasing War bonds with a maturity value of \$1,143,975 during the campaign.

We are proud of the large part the shipyard took in helping New Hanover county surpass its goal. Total sales in the city and county were \$6,994,848 as against a goal of \$6,053,000.

Our efforts were carried out on three fronts. First, campaign sales to employees at a special booth and at the bond office amounted to \$203,825, maturity value. The booth was opened several days after the start of the drive and scores of young women employees attended to the sales there. Their work is appreciated and they made a real contribution in time and effort in the campaign. Next, regular payroll deductions for bonds during the campaign period totalled \$440,150, maturity value. And third, the company purchased \$500,000

Group Insurance Plan Is Approved

**Goes Into Effect Here
As Majority Make
Application**

With a substantial majority of the yard's employees applying for participation, the co-operative group insurance plan has been approved and is now in effect here.

Representatives of the Aetna Life Insurance company, which underwrote the program, said the response was most gratifying and it is hoped that at least 95 per cent of the employees will take advantage of the life, accident and sickness insurance within the near future.

It was pointed out that if anyone was overlooked during the application sign-up and wishes to participate, he should see his or her supervisor. Any individual who was employed before November 1 but who failed to make application has until December 1 to do so without taking a medical examination. Employees hired after the plan became effective, on November 1, may make application when employed and the insurance will become effective upon the completion of three months of continuous active service.

RARE SCENE—This picture of six C-2 ships tied up at the outfitting pier is an unusual one and is only possible because the necessary materials to complete these vessels have not arrived.
