The FAMILY DOCTOR

(By John Joseph Gaines, M. D.)

PRACTICAL IDEAS

I read this week in a popular medical magazine, that the people had been "fed up" on health suggestions in public print, from so many hundreds of writers,—that they had become tired of it all; just such a mess of theories on diets and nutrition, and the conduct of one's self—that Mister John X. Public had about decided that there was nothing in any of it.

I am sorry of course, for such a state of mind to come about. Most every written article by a thoughtful, competent advisor is worth reading and thinking about these days. You can take the part of it that applies to you individually, and brush the rest aside.

Now, here's a practical thing: Everybody likes a good complexion; thousands—possibly millions of dollars are spent annually by our splendid American women, just for cosmetics, "skin foods," and blemish removers. Let me give you my remedy—rather rule—for keeping a good complexion.

When you leave your bed in the morning, visit the lavatory the first act before you dress. Wash the face, neck and even the upper chest with warm water and mild toilet soap. There are many good brands of the latter—I emphasize a mild—not a strong—soap. Use a soft, smooth towel for this part, wet with the warm, soapy agent.

After completing this act, turn on the cold-water faucet and seize your rough towel. Go over the parts you have cleansed, with brisk rubbing—the glow will surprise you, after a few treatments. Don't prolong the cool friction—rather hurry; work fast. No soap.

In time this will give you the fine complexion you like to have. If you are generally run-down—but that is another matter—see your doctor. You don't need to BUY your color; get it the right way. Men, quit us-

ing those hot towels at barber-shop. Try above plan.

Sun-Back Gingham

Here is a summer sun style, as worn by Helen Krakeur of New York in a pre-season view at Palm Beach. It is a blue gingham sun back beach dress with knitted white hat.

NETTLES SILENT

Solicitor Zeb V. Nettles refused Monday to divulge the time of his departure for Nashville, Tenn., with extradition papers for Colonel Luke Lea, and his son, Luke, Jr. He said, however, that the time had been set and that he would be accompanied on the trip by deputies of the sheriff's department.

PICKED 4 FOR CABINET

Organization of the new Democratic government took shape at Warm Springs, Ga., Monday as President-elect Roosevelt went into conference with his closest political advisors. The following appeared to be certain cabinet members: Senator Glass, of Virginia, secretary of the treasury; Senator Walsh, of Montana, attorney general; James A. Farley, of New York, postmaster general; Miss Frances Perkins, of New York, secretary of labor.

ILLUSION:

This very old illusion was invented by Indian fakirs. The secret was unearthed in 1849 by the great magician, Robert-Houdin. At that time, ether had just been discovered, and little was known about it. Houdin claimed that he had discovered that this new anesthetic could make people light as air. To prove it, he caused the subject to rise into the air and float apparently suspended. He passed a hoop around the body to show there were no wires or supports.

EXPLANATION:

There are many, many explanations for this old trick. One is that the girl wears a concealed harness, which ends in a socket between her shoulder blades. This is attached to a piston below the stage. The piston is pushed up from below, causing her to rise in the air. The piston is invisible, because it is covered with mirrors which reflect surrounding draperies, similar to the background. The magician can pass the hoop over her body because it is cut in one place. It can be pulled apart for a second when it passes the piston.

It's fun to be fooled — ...it's more fun to KNOW

Another "magic show" is cigarette advertising.

One of its greatest tricks is the illusion that cigarettes can be made miraculously "MILD" through manufacturing methods.

THE EXPLANATION: All popular cigarettes today are made in modern sanitary factories with up-to-date machinery. All are heat treated—some more intensively than others, because raw, inferior tobaccos require

more intensive treatment than choice, ripe tobaccos.

The real difference comes in the tobaccos that are used. The better the tobacco, the milder it is.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

This is why Camels are so mild. This is why Camels have given more pleasure to more people than any other cigarette ever made.

It's the secret of Camels' rich "bouquet" ...their cool flavor...their non-irritating mildness.

All the natural, ripe goodness of Camel's tobacco is kept fresh for you by the famous air-tight, welded Humidor Pack. Don't remove it.
