Nance Prepares Folder On Home Meat Curing

The low price of hogs on the market has led to increased interest in curing meat at home this winter and to aid farmers in this work, the agricultural extension service of State College has prepared a brief folder on the subject. The publication is available now, free of charge, to those requesting it.

For more than two years R. F. Nance, associate professor of animal husbandry at the college, has been holding a number of meat cutting and curing demonstrations about over the State. Reports from county agents indicate that this work has been very useful and that many farmers have adopted the suggestions given. So many questions were asked at these demonstrations that Mr. Nance has embodied the more important of these in the new folder and has attempted to give concise answers.

The new publication shows the cuts of meat to be found in the carcass of the hog, the beef animal and the lamb. The materials in preparing an animal for curing and the

formula of the brine and dry cures are given. A few general facts about the work are also included. The extension service printed only 5,000 copies of the new folder but these will be sent out on request as long as the supply lasts. The publication may be had on application to the agricultural editor at State College.

ILLUSION:
The stage is all set for target practice. The magician lifts his bow and aims an arrow at the bull's-eye. His lovely assistant then steps in front of the target and he shoots the arrow—apparently through her—and it fixes itself in the very center of the bull's-eye! And she smiles through it all while the audience gasps.

EXPLANATION:
The arrow which the marksman "shoots through" his assistant simply folds up into the crossbow! The arrow which is actually embedded in the target is shot by the girl herself from a belt concealed under her dress. She releases a little spring, the arrow unfolds, and shoots straight into the bull's-eye! It is all done in a flash! So quickly the eye cannot detect the girl's movements! To heighten the impression that the arrow has gone right through, the girl releases a ribbon from the front of her dress—the continuation, apparently, of the ribbon attached to the arrow in the target.

It's fun to be fooled —
...it's more fun to KNOW

Like to see through tricks? Then let's look at another... the illusion in cigarette advertising called "Cigarettes and Your Throat."

The audience is told that by certain magic processes tobacco can be made as soothing as cough medicine. EXPLANATION: The easiest cigarette on your throat is the cigarette that is made from the choicest ripe tobaccos. Cheap, raw tobaccos are, as you would naturally expect, harsh in their effects upon the throat.

If you have to consider your throat, the quality of the tobacco in your cigarette is important.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Camels are as non-irritating as a cigarette can be because Camels use choice, ripe, tobaccos.

And because of the matchless blending of these costlier tobaccos Camels have a rich bouquet and aroma... a cool, delicious flavor.

Keep the air-tight, welded Humidor Pack on your Camels... to assure yourself and your companions a fresh, cool smoke.
