

SPRINGBOK KILLS COW
Springboks, which appear in motion pictures and to most people of Africa seem to be very demure animals, have their likes and dislikes. This was demonstrated by one during a stock sale in Nigel, South Africa, recently. As soon as it sighted a new cow the springbok broke away from its owner and drove its horns into the side of the bossy until the domestic animal was dead.

CLABBER GIRL
Baking Powder

BIG CAN 10¢
Millions of women have discovered the remarkable economy—and the wonderful baking results—gained by using CLABBER GIRL Baking Powder.

Like Gangsters
Bad luck comes all in a bunch, which is also true of laziness and dumbness.

Test a Coleman LAMP
10 DAYS in YOUR HOME

Use one of the New Coleman Lamps 10 days right in your own home. Prove to yourself, by test and comparison with any other type of light, that the Coleman lamp is every lighting need in your home with its 300 candle-power "live" pressure light that protects your sight. This offer is secured by a Money-Back Guarantee through your dealer. Just send a postcard asking for Test Certificate, giving name and address of your hardware or house-furnishings dealer, and we will send you a Test Certificate to present to your dealer.
THE COLEMAN LAMP AND STOVE CO., Dept. W1146, Wichita, Kans.; Chicago, Ill.; Philadelphia, Pa.; Los Angeles, Calif. [10-16]

Beware Coughs
from common colds
That Hang On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled. Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

FOUND!
My Ideal Remedy for PAIN

"Though I have tried all good remedies Capudine suits me best because it is unusually quiet and gentle." For headache, neuralgia, or muscle aches, use either Capudine Liquid or Capudine Brand Tablets.

CAPUDINE

ECZEMA...

To quickly relieve the itching and burning, and help nature restore skin comfort, freely apply

Resinol

Rid Yourself of Kidney Poisons

Do you suffer burning, scanty or too frequent urination, backache, headache, dizziness, swollen feet and ankles? Are you tired, nervous—feel all unwell and don't know what is wrong? Then give some thought to your kidneys. Be sure they function properly, for functional kidney disorder permits excess waste to stay in the blood, and to poison and upset the whole system. Use Doan's Pills. Doan's are for the kidneys only. They are recommended the world over. You can get the genuine, time-tested Doan's at any drug store.

Let Our Motto Be GOOD HEALTH
BY DR. LLOYD ARNOLD
Professor of Bacteriology and Preventive Medicine, University of Illinois, College of Medicine.

THE UBIQUITOUS TUBERCLE AND ITS RELATION TO MAN

According to a report just issued by the National Tuberculosis association of New York city, the tuberculosis death rate in the United States ranks seventh among the 30 countries listed. New Zealand, the Union of South Africa, Australia, Ceylon, Denmark and the Netherlands are the countries that have lower tuberculosis death rates. These figures are for 1928-1932. The listing for 1934 is not available yet because it takes time to tabulate the enormous amount of data.

Tuberculosis is one of the most prevalent of all contagious diseases. It is rightly called the white plague. It is spread over much of the known world.

And it is different from most of our other contagious diseases, which are what we call acute. If any one has typhoid fever, diphtheria, measles, scarlet fever, mumps, or whooping cough, he has a period of a few days to three weeks when he is confined to bed. But recovery takes place promptly after the fever stage is over. Tuberculosis, on the contrary, is a chronic disease. It can extend over a period of years. In the beginning stages patients may hardly be aware that they have it.

It isn't only the human race that has tuberculosis. Animals also can get it. Fish, turtles and frogs have tuberculosis. Birds, chickens and turkeys have tuberculosis. Cows have tuberculosis. The cold-blooded animals are infected with a tubercle bacillus that grows only at a low temperature, and hence cannot grow in man. Birds have a higher temperature than man, consequently it is hard to infect us with their tubercle bacillus. Some human cases have been reported, but avian tuberculosis in man is extremely rare. The tubercle bacillus that cows have, however, can grow in man and cause tuberculosis. But the disease is different from the true human type, as the lungs are seldom involved in bovine or cattle tuberculosis in man. Tuberculosis of the bones, joints and glands in children, however, are oftentimes caused by this particular kind of tubercle bacillus.

Most of us have breathed in or swallowed living tubercle bacilli many times before we reach the adolescent stage. The bacilli enter the body either are killed off quickly or else they find lodgment in some organ, usually the lungs, and there they grow in a small local spot of tissue. When the growth is very slow, as it is in healthy persons, then the surrounding tissues can wall off the infected area. It is as if a few thousand soldiers of an enemy country had succeeded in entering the center of some state, and then the defense soldiers in that state, who could not drive them out, had sealed them up in a tight-walled enclosure. Now if these invaders were able to live on the water, air and food that percolate through the walls, then you would have the same situation as exist in a walled-in tubercle foe. The invaders are harmless so long as the wall holds them prisoners, but if the wall gives way, we find an invading army right in our midst. Undernourishment and long fevers, such as undulant fever and parrot fever, and whooping cough, mumps, diabetes and anemia, all tend to lower the body resistance and open up holes in the walls enclosing the germ prisoners. The bacilli swarm out of the opening, and spread rapidly through the adjoining tissues.

The best way to prevent tuberculosis is to prevent the tubercle bacilli from getting into our bodies. But this is almost impossible to do in the present condition of modern civilization. We have to mix with many different people. Do you ever count the number of persons you talk with daily, shake hands with, or stand or sit next to in a movie theater, church, restaurant, store, street car or bus? Some of them are sure to have tuberculosis. Children, too, come in contact with persons impregnated with this disease.

One should almost have to live on a desert island, with absolutely no contact with the outside world, to be safe from infection.

Consequently, since we can hardly prevent tuberculosis germs from coming into our bodies, the next best thing to do is to keep our bodily health in such daily good condition that we can destroy the germs that do get in, or, if the dose is beyond our ability to destroy, that we can imprison them in the capsule form just described. Then our chances are very good for going through life without being invaded by the disease.

But medical science is conquering the disease.
