## THIS WEEK

- 160,000 Horses
- A New Democracy
- Thin Men Live Longer
- Must We Have War?

The well advertised Queen Mary, looking very big moving up to her New York dock, represented in reality the quintessence of compressed power. On the way over she developed one hundred and sixty thousand horse power. That number of horses hitched in pairs, one ahead of the other, would make a "team" more than two hundred and fifty miles long. Still more remarkable power compression is that of the flying engine, which compresses the power of a 1,000-pound horse into less than three pounds of metal.

The government offered for sale six hundred millions of 2% per cent bonds, four hundred millions of 1% per cent notes. The whole issue is oversubscribed.

It is a comfort for those that have money and want no risk to invest even at low interest rates, free of income tax payments.

Such an investment is much simpler than running the risk of a business enterprise with pay rolls and jobs attached.

To tax heavily the man who uses his money and brains to give work to others, and free from taxation those that buy bonds and take their ease, is a brand-new kind of democracy.

Men of middle age and older may learn from Civil war veterans in the Memorial day parade, some ninety and some ninety-three; one, who led New York city's G. A. R. procession, past ninety-six years of age.

All the old soldiers are very thin men, averaging in weight less than 140 pounds. Had they been fat they would be in the grave, not in any parade.

General Pershing cut a big birthday cake with a general's sword. Mrs. Roosevelt looking on, and on Memorial day he warned America against another war.

To believe that this country can be dragged into a war without a repetition of our big war folly is not complimentary to those in charge. No foreign nation would force war on the United States, and thus put United States resources, and any fighting qualities that Americans may possess, on the side of that foreign nation's enemies.

The unfortunate Congressman Zioncheck, from the Northwest, is locked up in Washington, his sanity to be investigated, after he visited the White House with a present of empty beer bottles for the President.

The unfortunate congressman's antics are not important in themselves, but you wonder what qualities were seen in him by voters that sent him to congress.

The United States Supreme court declared unconstitutional a New York state law that would permit New York to fix a minimum wage for women and children.

Chief Justice Hughes, who did not agree with the majority opinion, wrote: "I find nothing in the federal Constitution which denies to the state the power to protect women from being exploited by over-reaching employers."

Alfred P. Sloan, Jr., who ought to know about American industry, says enormous building operations are needed in the United States to replace out-of-date equipment, and that the door is wide open for "plenty of jobs and then more jobs."

American cotton growers fighting the boll weevil will sympathize with Argentine growers, attacked by vast swarms of devouring locusts far worse than any weevil. The Argentine ministry of agriculture announces 10,000 tons of cotton devoured, 60,000 acres invaded.

Farmers fight the locusts by erecting walls of sheet iron or digging ditches, into which the locusts swarm, to be sprayed with gasoline and burned. Tons of the pests are thus destroyed.

Mayors of Arab cities in Palestine warn the British that they must stop Jewish immigration and the sale of land to Jews in Palestine. The British answer to the warning will probably not be satisfactory to the Arabs. It is reported also that the central committee for Palestine of the "Communist party" is distributing literature urging British soldiers in Palestine to mutiny.

President Lewis of Lafayette college thinks wars would end if monarchs who voted for it were put in front line trenches. That might prevent some wars, not all.
