Germany admits willingness to side with Japan in a fight against bolshevism. Practical Stalin, man of few words, tells Japan what he thinks of her pact with Germany by refusing to renew a treaty that permits Japan to fish in Russian water

off the coast of eastern Siberia. That fishing privilege is vitally important to the feeding of Japan's surplus millions, increasing at the rate of one million new Japanese every year.

Langdon Post, New York's commissioner of housing, tells the Amer-ican Federation of Labor that a great national shortage of houses exists, because there has been no building. New York City, especially, is in a bad way, according to Mr. Post: there the shortage in housing "may have tragic consequences."

That is good news for the building trades, and temporarily good news for landlords; they will not overbuild. As usual, politicians will seize the opportunity to raise taxes, and presently money lenders will be once more selling real estate under foreclosures.

Life is a brief game of seesaw -now up, that is prosperity; then down, that is depression. The budget is not the only thing that needs balancing.

Our neighbor. Nicaragua, well advanced in modern intelligence, establishes a military flying school, orders fighting planes from the United States, hires a first-class instructor. There is progress everywhere, and you realize it when you read in chapter 26 of Westermarck's "The Origin and Development of the Moral Ideas":

In ancient Nicaragua women were held unworthy to perform any duty in connection with the temples, and were immolated outside the temple ground of the large sanctuaries, and even their flesh was unclean food for the high priest, who accordingly ate only the flesh of males.

It is estimated that congress will be asked to appropriate as much as \$1,500,000,000 for relief in the next session.

Although he professed himself gratified at the inroads upon unem-ployment by industry, the President ented upon the fact that private business has not yet absorbed vast masses of the unemployed and that millions of persons remain on the Works Progress administration pay roll and other governmental agencies

Mr. Roosevelt declared it was "widely known" that many of the largest industries will not hire workers over forty years of age. To a large extent, he charged, this policy is responsible for the relatively large number of older workers on relief. And industry must expand opportunities for the hiring of unskilled workers, he said.

LOS ANGELES may have its drawbacks (loud cries of "no!" from all native sons, including the foreign-born ones), but she certainly spoils a fellow for the clinkerladen, smut-freighted atmosphere of many other cities.

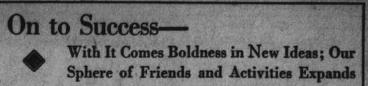

Take Chicago, where the weather bureau, if so inclined, frequently might report a two-inch fall of soot. Or Pittsburgh, where a chap comes home for a week looking as though he'd been cleaning out a soft-coal stove. New York is nothing to brag on, either. Leave a snow-white pup out over night and he could pass for a Dalmatian.

Yet heating engineers say that proper smoke consumers would produce such saving in fuel cost as to pay for themselves in about one year. Or possibly the citizens fear they might collapse their lungs and choke to death did they start breathing something remotely resembling fresh air?

MAYBE you'll remember - it was in all the papers - the lady who got a divorce in Chicago some time back by alleging that on the Fourth of July her husband assailed her with firecrackers: on Thanksgiving day he threw a turkey at her, and on Christmas morning he beat her up with a Christmas tree.

But assume the union had lasted until now. You can imagine the poor woman's anguish if, through the last political campaign, her husband had made her read all the polls taken on the election by the inspired outfits that did take polls and through that period had compelled her to listen on the radio to the average professional broadcaster on football games, especially the rapid - fire descriptionist who talks all at once and gets so excited himself that the game, in comparison, seems but a tame and commonplace affair!
