Household Questions

Pastry made with too much water is tough and hard. Use only enough water to hold the ingredients together, mix quickly, roll and handle as little as possible.

Grease your measuring cup before measuring syrup or molasses and the ingredients will not stick to the sides of the cup.

Do not put too much wax on floors. A little wax and plenty of polishing makes a better-looking floor.

Doeskin and chamois gloves become stiff and harsh unless washed in tepid suds and rinsed in slightly soapy water.

Do not use soft butter or lard in making pie crust. The shortening should be hard and cold.

A mixture of equal parts of salt and vinegar will quickly brighten copper or brass ware.
