# MANY STATES USE CONVICTS

Different systems of Employing Prison Labor on Public Highway Improve-ment is Described.

Thirty states at the beginning of the present year had on their statute books laws providing for the employment of state prisoners in road building. Arizona, Arkansas, Idaho, Louisiana, Maryland, Montana, Nevada, New Jersey, New Mexico, Ohio, Oregon, Virginia and Washington follow practical-ly the same system, providing that the control of this work shall be vested in the state highway commission. The highway commission or state engineer makes requisition for such number of prisoners as he can use effectively, and the prison authorities turn over to him such prisoners as are suitable for the road work.

The prison commission or board of control of state institutions is held responsible for the development of

### Convicts Building Good Road.

the convict road work in some nine states-Colorado, Indiana, Iowa, Kansas, Michigan, Missouri, North Da-kota, Oklahoma and Wisconsin. State prisoners are turned over to the county authorities to be worked on the county roads in Florida, Georgia, North Carolina and South Carolina. This system is not approved by the national committee on prisons and prison labor, which holds that the state under no circumstances is justified in delegating the responsibility for its convict wards to county au thorities.

The system in New York state divides the responsibility for the construction work and maintenance of the camps between the state highway department and the commissioners of the countles in which the roads are to be built, with the state superintendent of prisons in final authority. In Utah, West Virginia and Wyoming the highway department and the pris-on department co-operate in the control of this work. The prison depart ment is fully responsible for the care and discipline of the prisoners, while the road department is called upon to do the work which it is equipped to do, the building of roads.

The committee has found this lat ter system essential to the successful development of convict road work The prison department is in a posi-tion to care for the prisoners and to handle such matters as food, ciothing, housing, medical attention, the afford-ing of educational facilities and recreMAYONNAISE EASY TO MAKE Popular Dressing Has Wrongly Bean Considered Too Difficult for the Busy Cook.

EINCE MOURTAIN DERALD, EINGS MOUNTAIN, N. U.

The making of mayonnaise dressing was formerly regarded as a very troublesome affair. Exceptional cooks or housewives, it is true, would assert that it was no trouble, once the knack was acquired; but as a rule it was not a popular dressing with busy cooks. The reason was not far to seek. In the first place, tradition held that if mayonnaise dressing curdled it must be thrown out and a new mixture started; and, as it often curdles, this was not a cheerful prospect to face when time was short. In the second place, tradition asserted that good mayonnaise could be made only by adding the oil drop by drop-a lengthy

and troublesome process. Tradition in both instances was wrong. If the mayonnaise curdles, an egg yolk should be broken into a clean bowl and beaten thoroughly and the curdled mixture added to this drop. In this way the mayonnaise will be recovered.

The three-minute mixture that saves the tedious drop-by-drop process is made as follows: Measure out the salt and mustard

into a bowl and add a whole egg, both yolk and white. Beat this mixture thoroughly and then add one-third of a cupful of oil, all at once. Beat this until it begins to thicken, then add another third of a cupful of oil. This makes a fairly thin mayonnaise. If a thicker one is desired more oil must be added, making a cupful of oil in all; beat until very stiff, then set the bowl on ice until the dressing is

wanted. Mayonnaise made by this process is less likely to curdle than that made in the old way, and the mixture is quite as good.

A bowl or jar of mayonnaise will keep for some time if put in the refrigerator, and it is very useful to have on hand. It is well to remember, too, that a mayonnaise can be transformed into a tartare sauce by the addition of chopped gherkins and capers. Therefore it is economy in time so to plan your menus that a fish dish with a tartare sauce is followed the next day by a salad requiriug a mayonnaise dressing, or vice **Verss** 

FOR USE IN THE LAUNDRY

### Best Soap is That Made of Fat and an Alkali-Excellent for Disinfecting Clothing.

The best laundry soap (made of fat and an alkali) is, during the proc-ess of making, kneaded like dough. This admits air into the soap and s it to float when hardened. A soap that floats dissolves easily in water and is excellent for disinfecting purposes. The alkali and the saits of the fat acids combine with the water and this solution readily penetrates porous substances and adheres to solid surfaces, killing any fully developed

bacteria that it touches. Such a scap solution combined with boiling water is invaluable for disinfecting clothing from the sick room, where there has been an infectious disease. Pour the boiling water and sonp solution down the pipes of the kitchen sink and the bathroom con nections. Use it once a week at least for cleansing the garbage receptacle The solution may be used for disin-fecting floors. Have one pail of the soap and water and another of clean hot water. Scrub the floor and baseboard with a stiff brush dipped in the and water, rinsing the brush carefully in the hot water after each application .- Today's Magazine,

Strawberries in Jelly. Make some lemon jelly with one pint of water, six small or four large lemons, ten ounces of sugar, about an ounce of gelatin and one wineglass of sherry wine. Squeeza the fulce from the lemons on the sugar, adding the water, and, when dissolved, strain it and add the gelatin which has been lissolved. Pour this into small folds or cups and set on ice to harden. When ready to serve, turn them carefully ter, which is to be filled with choic berries and whipped cream.

Calm Resignation. HADN'T THOUGHT ABOUT THAT Reference having been made to beautiful resignation, Congressman

Joseph J. Russell recailed an appropriate story. During a dinner party some time ago, the congressman said, the topic turned to the connubial state. Among

the guests was a bachelor person, "Speaking of marriage," eventually remarked the bachelor, "it seems that the longer a man is married-" "The happier he is," impulsively broke in a spinster party with a hope-

# GOOD ROADS ARE INCREASING

United States Leads France in Miles of Improved Highwaya-State Ald Now in Effect.

According to the Good Roads Year Sook of the American Highway association, recently issued, America now clation, recently issued, America now has 6,000 miles more of good roads than France, the total for this coun-try now amounting to 31,000 miles. Of this 5,000 miles were built in 1912 and out 6,000 in 1914, making a total of over one-third of the entire mileage of good roads of the country.

New Jersey was the ploneer state to provide state ald for public highways, in 1891, and Massachusetts and Con necticut soon followed, but it is only during the last ten years that the state aid policy has been in effect to any considerable extent.

Los Angeles to Improve. Seven million dollars will be ex pended on the roads of Los Angeles in 1915. Three hundred and twenty-four miles of concrete boulevard and 160. miles of decomposed granite highway will be constructed.

Farmer Realizes Value. No other citizen realizes the value of good roads as does the farmer.

Judging a Community. A community can safely be judged by the kind of highways it maintains

### Rice Maringue.

Cook half a cupful of rice in one quart of milk until tender, and the yolks of four eggs beaten until light and mixed with half a teaspoonful of salt and half a cupful of sugar; cook two minutes longer, then remove from the fire, flavor with two tenspo-of vanills and turn into a baking of vanish and turn its ages until stiff, fold in three tablespoonfuls of pow-dered sugar, flavor with a few drops of lemon. Spread this over the pudding and brown lightly.

### Vanilla Ice Cream.

Two quarts of milk, two cans con densed milk, one-half pint of cream one tablespoonful vanills and very lit tle, if any, sugar. This is smooth and fine grated. Coffee ice cream is made in the same way by using three pints of milk and one pint of strong coffee.

Strawberry Sauce. Crush a large cupful of strawberries and mix with half a cupful of granu-inted sugar. While a cupful of cream till very stiff. Then stir the straw-berries lightly into it.

Preserving Rhuberh. Just wash it and cut in small pieces. Put in jare all it will hold, then fill up with cold water until it runs over. Put covers on. Will keep a year if you want it ta
