

**HOME BUILDING AND LOAN A GROWING CONCERN**

The Home Building and Loan Association is a progressive, yet reliable institution whose admirable policies and superior service to the public is evidence by the fact that their business has been steadily growing since organization in 1923.

This institution has added to as great an extent as any other in the the upbuilding of the social and home life of the community.

It is an institution in which the people have confidence, not only because the laws of the State and nation make it a safe association to do business with, but also because its affairs have always been in the hands of men of experience in the

commercial world; men who know the people and men whom the people know.

The object for which this institution was organized was to furnish a safe profitable place for investment for its members and use these investments to aid other members in building and owning their homes.

The wise policies of its management is evidence by the fact that it has large assets. The safety of its methods is further evidenced by the fact that it loans exclusively on first mortgages, real estate.

The real citizen is the home owner and the Home Building and Loan Association has helped many a man on the road to success by encouraging home ownership.

We take pleasure in this edition of pointing to the Home Building

and Loan Association as one of the vital factors in the continued development not only in Kings Mountain, but in the entire community.
