

Soft Ball Results

The past week's play saw Grover's fast-stepping outfit finally stopped, as Red Fulkerson's Pauline club licked them on their home lot yesterday afternoon by the story-book score of 1-0. The Grovers had previously cramped the Stags pennant drive on Monday, 6-1, with the aid of eight errors. The Bonnie, Old Mill, and Post Office lost both games, and the Margrace stepped into the picture with two victories, which carried them to third place.

Even though there are seven games yet to be played, the next week should give a pretty good idea of who will eventually cop the first half pennant.

Games of June 20:

	R	H	E
Grover	003	101	1 6 10 0
Stags	0191	000	0 1 2 8
Old Mill	002	101	0 4 8 4
Pauline	480	212	x 11 12 2
Bonnie	103	020	1 7 11 3
Margrace	242	000	x 8 12 3
Mauney	202	006	0 10 15 3
Post Office	004	030	0 7 4 4

Games of June 22:

Mauney	201	211	4 11 16 5
Old Mill	001	010	0 2 7 10
Pauline	010	000	0 1 7 0
Grover	000	000	0 0 8 1
Bonnie	100	020	0 3 9 5
Stags	514	010	x 11 12 4
Post Office	002	030	0 5 9 4
Margrace	330	103	x 10 15 3

Personals

(Cont'd from Society page)

Stationsville. Herman Mauney brought his little cousin, Franklin Schell back to spend a week here.

Mrs. W. R. Everhart spent the past two weeks with her daughter, Mrs. Lloyd Watson in Boone. Mrs. Everhart was accompanied home by Mrs. Watson and little daughter, Shirley, who are spending the week in Kings Mountain.

Mr. Nick Moss left recently for Havana, Cuba, where he will spend the summer, as tutor in English to some students of Riverside Academy. Miss Mildred Moss accompanied her brother as far as Miami, Fla., where she is a guest of Miss Mary Gambrell.

Mr. and Mrs. J. F. Allison, Miss Sara Allison and Mrs. J. M. Williams were guests of Mr. and Mrs. Harvey Williams at Rankin Lake, near Gastonia, Tuesday evening when they entertained Mr. Williams' store force and a number of friends at a Steak Supper.

Mrs. Charles Campbell accompanied Mrs. J. N. Gamble to Asheville for the Rhododendron Festival. Mrs. Campbell and Mrs. Gamble visited Mrs. Hugh Fisher of Marshall and Master Hugh Fisher Jr., accompanied Jackie Gamble home for a month's visit.

Mr. and Mrs. James Hawthorne and James Hawthorne, Jr., of Pittsburg, Pa., who were en-route to Columbia S. C., stopped in Kings Mountain for a visit to relatives during the week-end. Mrs. Hawthorne is a

niece of Mrs. A. J. McNeil and Mrs. A. H. Patterson.

Mr. and Mrs. Sidney Upchurch, whose marriage was an event of June 11th, returned to Kings Mountain Saturday night and are guests of Miss Marie Whitesides for several days. The couple spent their honeymoon in New York City and Washington and will leave this week for their home in Atlanta.

Pulp Mills Provide Vast Timber Market

Four pulpwood mills in North Carolina and seven others in adjoining States provide Tar Heel farmers and timberland owners with a market for

millions of dollars worth of cull trees every year, said R. W. Graeber, extension forester at State College.

In a normal year, these mills use around 480,000 pulpwood units of 100 cubic feet each. Pulp mills prefer wood in five-foot lengths, and a unit is 4 by 3 by 8 feet in size. Messured in the old way, the annual consumption amounts to 600,000 standard cords.

Cull, crippled and crowd trees that cannot grow into good poles, piling, or saw timber will make good pulp, Graeber explained, but when a fine, straight saw-log type tree is sold for pulp, it will not bring as much as it would if sold to a saw mill for lumber.

Graeber urges farmers to make use of the pulp market by thinning their woodlands and selling the "weeded out" trees for pulp. This will give them a source of cash income while they are improving their stands of better trees.

Often farmers want information regarding the location of pulp mills, the kind of wood each uses, and the territory which the mills can purchase wood; the amount and quality of timber in a stand, how to scale trees for pulpwood and for saw timber; the best methods of woodland management and harvesting so as to get the greatest returns and at the same time provide for a future timber supply.

Farmers are invited to see their county farm agents or to get in touch with the extension foresters at State College, who offer their services without charge.

Urges Growers Keep Watch Over Gardens

Outbreaks of disease and insect infestations will do less damage to the garden if the grower keeps a close watch over his vegetables so that control measures can be started as soon as possible after the plants are attacked.

A mixture of three-fourths of one per cent rotenone dust will destroy leaf-eating insects such as has been beetles and cabbage worms. Plant lice and harlequin bugs also die when covered by this dust, said H. R. Niswonger, extension horticulturist at State College.

A distinct advantage in using rotenone is that this material does not have any harmful effects upon human beings, and plants may be dusted right up to the time they are to be harvested without danger of making the consumer sick.

Poisoned Bordeaux dust is recommended for eradicating flea beetles feeding on tomato and pepper plants. Bordeaux mixture will control the leaf spot disease of tomatoes, peppers, cucumbers, and cantaloupes Niswonger added.

He also stated that in growing sweet potatoes, the best results are obtained when the plants are NOT fertilized with stable manure or sweepings from the hen house floor. A 3-8-8 fertilizer mixture applied at the rate of two to three pounds per 100 feet of row is best for sweet potatoes for the average soil types.

Farm Questions Answered

Q.—Is it possible for the poultry flock owner to do his own blood testing?

A.—It is possible but not advisable unless the owner has had special training along these lines. While advertisements may say that the testing is simple and that anyone can do it, the proper interpretation of the test requires training, and, for the safety of the flock it is much better to have this work done by a professional.

Q.—What proportion of cottonseed meal can be used in a ration for hogs with satisfactory results?

A.—Recent experiments show that when equal parts of fish meal and cottonseed meal are used as the protein supplement, the animals made more rapid and cheaper gains than where other mixtures were used. However, no ill effects were evident from a larger consumption of cottonseed meal, but the rate of gain was lowered. By replacing one-half of the fish meal with cottonseed meal, each 100 pounds of cottonseed meal saved 111 pounds of shelled corn and 31 pounds of fish meal, without any value being placed on the increase in rate of gain.

CARD OF THANKS

We wish to thank all our friends for their kindness shown us during the sickness and death of our baby. Mr. and Mrs. Forest Sipe.

POULTRY TO BE GRADED IN NORTH CAROLINA

Raleigh, June 21.—Poultry will be graded in North Carolina for the first time in history of the State beginning July 1, Randal B. Etheridge, chief of the State Department of Agriculture's markets division, announces today.

C. W. Sheffield, senior marketing specialist, has been licensed by the Federal Bureau of Agricultural Economics as the State's first supervising inspector of dressed poultry.

Under present plans, licensed graders will be trained to operate in North Carolina, giving consumers in the State the benefits to be derived from buying poultry based on federal

arrangements have already been made to train inspectors in Durham and Greensboro within the next two weeks, looking toward the improve-

ment of poultry on these markets. Other inspectors will be trained and licensed by the State Department of Agriculture's markets division as rapidly as possible.

Federal-graded poultry will be sold according to the following standards: Grade "A" poultry, or the best prime well-fleshed and fattened; Grade "B" or choice poultry having normal flesh and good edible quality; Grade "C" or commercial-class poultry which is poorly fleshed and improperly dressed.

In addition to furnishing instructions to applicants who desire to become dressed poultry inspectors, the markets division will furnish supervision to maintain the standards required by the federal government.

Many Craver County farmers have replanted their corn crop three times due to heavy insect infestation.

Cotton Classing House To Be Built by Dept. Of Agriculture

Raleigh, June 21.—A modern, \$20,000 cotton-classing building will be erected by the North Carolina Department of Agriculture immediately "to give the state better grading services which will inevitably result in better prices for cotton." Commissioner of Agriculture W. Kerr Scott announces.

The cotton classing building, to be located in Raleigh, will be a part of the State Warehouse System of the Department of Agriculture.

During the past year, the warehouse division has received approximately 75,000 bales of cotton without cost to the farmer and plans are now under way to increase the marketing services rendered the cotton farmer.
