### THEY SAY

"Ignorance has contributed more to the downfall of nations than any other single cause, and this nation of ours may prove no exception because there is a deplorable ignorance among us of the things that have made this country the greatest in history in material progress that have brought to 7 per cent of the world's population in the United States occupying only 6 percent of the world's inhabitable lands, one half of the world's wealth and more than one half of the world's income" — Robert L. Lund, Executive vice-president, the Lambert Pharmaceutical Co.

"The public has too deep an interest in industrial peace to sanction constant wars of turmoil." — U. S. Senator Burke.

"The real enemy of Fascism just as of Communism is education; not any kind of education, but education for free men in a free world." — Ivan Russell of Teachers College, Columbia University.
