

The
Kings Mountain Herald
Established 1890
Published Every Thursday

HERALD PUBLISHING HOUSE,
Haywood E. Lynch
Editor-Manager

Started as second class matter at the Post Office at Kings Mountain, N. C., under the Act of March 3, 1893.

SUBSCRIPTION RATES
One Year \$1.00
Six Months 50

A weekly newspaper devoted to the promotion of the general welfare and published for the enlightenment, entertainment and benefit of the citizens of Kings Mountain and vicinity.

JUMP RIGHT IN AND DO IT
When on you a job is laid,

Do it

Jump right in, don't be afraid.

Do it

Boys never walk about
Giving work to men they doubt.
But when they pick you out.

Do it

Stick right there and play the man
Do it

They who ordered think you can
Do it

Never doubt yourself, but say.
They have faith in men or they
Would not throw this chance my
way.

so I'll do it

Selected

AUTUMN

It is the Indian summer. The rising sun blazes through the misty air like a conflagration. A yellowish smoke haze fills the atmosphere, and a thin mist flies like a silver lining on the sky. The wind is soft and low. It waits to us the sides of forest leaves that have wilted or are dropping branches or drop into the stream. Their gorgeous tints are gone as if the autumnal rains had washed them out. Orange, yellow and scarlet all are changed to one melancholy russet hue. The birds too have taken wing, and have left their roosts dwellings. Not the whistle of a robin nor the twitter of an evanescent swallow, not the call of one sweet, familiar voice. All gone. Only the usual cawing of a crow as he sits and curses that the harvest is over, or the chitter-chatter of an old squirrel, the nots, dozen of a hollow tree, the mendicant friar of a large parish, the research of a dozen acorns. Longfellow

JAVE LESPEDEZA SEED

Lespedeza is the favorite soil-covering crop and one of the principal grazing and hay crops of Tar Heel farmers. Enoch C. Blair, Extension agronomist of N. C. State College, reminds North Carolina farmers that the season for sowing lesions has begun. During the War, when nitrogen fertilizers are extremely scarce and likely to become even harder to obtain, it is the patriotic duty of every farmer to grow legumes, said the Extension Service specialist. We also need more feed and pasture to meet our livestock production goals in the Food-for-Freedom program.

Out of every seven and one-half dozen eggs produced in the United States this year, at least one dozen will be dried to supply leans requirements of America's allies.

SUPER SNOOPERS

Well, now that Hallowe'en is over and we have our gates, chairs and flower pots together again, we will spill the beans on some spying we did. Everything seemed to be coming O. K. at Arilla Caldwell's, Hazel Rhea's and Emogene's party. How about the party Thursday night at the Church? — Jackie seem ed to be enjoying herself.

Betty Hayes and Charles, Frances White and Henry, and Chris and Charlie seemed to be having quite a time at Frances White's party Friday night.

The "Hay Ride" Saturday night went over with a bang! Mary Ann and Timma, Peggy and Shorty, Doris and Ted, E. Ruth and Salty, Toots and Jimmie and Helen and Jack were some of the couples on the Hay Ride. Peggy M. had a time riding the mule — regular old "cow girl" — isn't she?

By the way that's a swanky brace let E. Ruth is wearing. Salty, how often do you pass them out?

It's quite a frequent thing to see Dennis and Bobby talking — about lessons and John R. and Margaret walking around the hall together.

We haven't seen Bobby and Dorcas together lately — could the old flame be dying??

We hear George L. the new boy has been making eyes at the girls. Maybe some of these lonely hearts can catch the new, blond headed boy — cute boy.

Margaret T. who was that cute soldier we saw you with the other night?

Why was Virginia Allen all smiles last week — is her minister friend coming? She and Frances Sharp have something in common—don't they?

Katherine and Frank, Louise and Charles, Martha and George, Martin and Peter, Jean and Mac, and Doris and James seem to keep the hall man on the run.

We better save a little money for next time but remember — We are the snoopers. And soper we are. We have your number Right up to Par.

Here and There

By Haywood E. Lynch

It's Wednesday night 11:00 and I must get something in this column because the fellow in the corner shop said this afternoon that there was the first thing they read when they received their paper.

Fred Wright was shaving Clyde Bennett and the contractor said, "Why the very first thing I read is Lynch's phffit But what to write about I don't know. I could mention that L. L. Gossen's father who lives in Charlotte celebrated his 80th birthday or how fine it was of Mrs. G. E. Neiter to give that \$1,000 to the Woman's Club to pay off the mortgage on the building or that how proud Kings Mountain is of Lt. Joe Penland. I had 10 people to call me and tell me about his receiving the distinguished medal of honor or about Sage Fulton mailing his copy of The Herald to Billy each week or about Booth Gilstrap presiding at the Election Tuesday with Capt. O'Farrell looking on or about Ted Weir busy in his store Wednesday morning or about Charlie Thompson sunburned from his Florida trip or about Mr. LeBaron the Solvay Co. (Bedoumen) in the office trying to find a house for his family to move in or about E. E. (Center Service) Marlowe being happy over the fact that Goodrich is going to make a new tire called the V-36 that will soon be on sale or about several good jokes I have heard lately, especially the one about the negro who was about to be electrocuted or about Milton Ruth complaining about the high price of certain commodities or about Mr. and Mrs. P. D. Morison being so busy that they are having to board with the Morris ... or about Mr. Gus Mauney sending a baby crib to his son, L. Jake in Georgia ... or about the Editor of The Herald misspelling "Feast" last week ... or about John Floyd writing me a newsy letter last week, and the adding: "P. Don't Print" ... or about this column is now long enough, so I quit.

OUR RATION IS WEEKLY FEAST

The average adult Briton's ration of 31 ounces a week includes meat of all kinds. He gets 20 percent less fish and a third less poultry than before the war and only one tea a month. Compared to meat allowances throughout Europe, our voluntary share-the-meat ration of 2 1/2 pounds of "red meat" per person with no restrictions on liver, kidneys and other "variety meats" is a weekly feast!

Ride-sharing is a most important part of the five-tire program to saving tire rubber. No extra gasoline rations will be issued to those who claim the need for additional gasoline to drive to work or for necessary business trips unless they belong to a car-sharing group and can prove that this is not possible and no other means of transportation is available. All members of group ride clubs among war workers, however, can get tires recapped if recapping is needed, and if their tires are beyond recapping, they may buy new tires of reclaimed rubber. The number of those who may secure "preferred" or extra-mileage rations have been reduced, but among those who still have mileage privileges are farmers carrying products to market, farm workers, commercial fishermen and marine workers going to and from their work, doctors, veterinarians, nurses and ministers engaged in essential services away from their homes. Every-

Office For War Information

VA., N. C., S. C., REGIONAL OFFICE

THE HOME FRONT

The devastation of Europe by the Nazi hordes, like a destructive flood begins to sap the foundations of the "new order" that Hitler has tried in vain to erect. Typhus, scourge of World War I, is on the increase in Nazi-held territory and in the Balkans. The German army is unaccustomed because of a reported mistake — German scientists tried to produce vaccines of superior quality, but failed to achieve mass production. There are reports, too, of decreased war output by the Nazis' enslaved workers. Those in occupied lands — weakened by privations and suddenly resisting "cooperation" — fail to deliver fair trade products of all kinds, including foods.

Except for potatoes, this year's European harvest is below even last year's subnormal crops, but the effects of acute scarcity are less apparent to the Germans, who have added to their larders for foods stolen from their victims. By this means the Nazis are able to provide an average meat ration of 12 1/2 ounces per week of the types of meats restricted in the U. S. ... In Norway, although the official meat ration is 7 1/2 ounces, actual consumption is far less on the average. In the Netherlands, the ration is fixed at 10 1/2 ounces, but a civilian is lucky to get one third of that amount, and for Belgians the allowance is only 4 1/2 ounces. ... The Poles are starving. Italians get from 2 1/2 to 5 1/2 ounces of meat 1 1/2 ounce of sausages.

TO REALIZE MEAT "TRIMMING" MEANS

When we start paying next year's taxes, we'll begin to realize how far the trimming process can go. The Government's war expenditures will run to about \$5 billion dollars this year, around \$1 billion in 1943. After deducting direct war needs, there will be left over for our use at home next year about 10 billion dollars worth of goods and services. By the last quarter of 1943 we will have only about three quarters of our normal supply of civilian goods to buy and sell. In the meantime for scarce goods the small retailer is at a disadvantage compared with larger stores. Faced with dwindling stocks and loss of clerks to war service, small shopkeepers will have to work harder, cut out unnecessary services to customers, increase self-service wherever possible, be careful in granting credit.

An important wartime economy is brought about by reducing styles, types, and patterns of manufactured goods. Many lines already have been simplified. Production of cast-iron kitchenware has been cut from about 200 different items to a dozen or so, and similar action has been taken in regard to kitchen, medical and hospital enamelware. Number of sizes of railway and transit service car wheels has been reduced from 500 to 50. Metal rayon and cotton garments have also been simplified.

WEATHER MAY UPSET FUEL RATIONS

While the Governor is making every effort to distribute fuel oil in the state-owned areas on a fair and equitable basis, the weather for any given month or particular area may upset calculations. Should abnormal cold occur at any time it may not be possible to increase the total supply of fuel oil on hand for that period. To be on the safe side, the homeowner should keep down his fuel consumption during mild spells and so build up a reserve to hold tide him over a severe cold snap.

Coffee drinkers will have to ration the consumption of their favorite beverage. With shipping space from South America getting more limited, imports of coffee have dropped. After November 28, every person in the country over 15 years of age will be entitled to one pound of coffee each five weeks, an amount slightly less than our previous average consumption. No more canned sauerkraut will be available after present stocks leave the storekeepers' shelves. The tin is needed for war use. Kraut will come in wooden or non-metal containers. To save metals, production of tire chains has been cut to 60 percent of normal output and the manufacture and sale of house trailers have been drastically restricted. Such mobile

Winter Hay, Grazing Corps Needed in East

Recent rains in the Coastal Plain have destroyed the value of a large part of the hay that was stacked outdoors in Eastern Carolina. The damage to pasture and soybean hay is being especially serious, reports E. R. Collins, Extension agronomy leader of N. C. State College.

Every effort should be made by livestock farmers to supplement their food supplies with fall seeded hay for winter grazing and spring hay, says Collins. Fortunately, there is still time to sow winter legumes and small grains to be grazed in February and March, or to be harvested for hay in the late spring.

The agronomist explained that the restrictions placed on the use of fertilizers containing nitrogen applied on small grains does not apply where the grain is not harvested. Where farmers sow small grains for grazing, or in mixtures with legumes for grazing, they will be able to obtain 2-12-6 and 2-8-10 fertilizers. Collins says that all winter hay and

grazing crops should be top-dressed with nitrogen February or early March.

One of the best winter hay mixtures, according to the Extension worker, is a combination of rye or Austrian peas and small grains. He suggests the per acre seeding of 15 pounds of rye or Austrian winter peas, 2 bushels of Palmetto No. 3 or Palmetto oats, 1-2 bushels of Carina or Redgrit wheat, and 1-2 bushels of Redgrit barley if available. This mixture should be planted as soon as possible, and should be tilled with 200 pounds per acre of 2-12-6 fertilizer at planting time.
