What You Buy With WAR BONDS
 The ordinary machine gun is too cumbersome for our Marines, especially for parachute troops. So the Marines have adopted new models of the M1919 sub-machine gun, a .45-caliber weapon.

The new gun used by the paratroops is a compact model with a pistol grip and a steel-frame stock which folds out of the way when not in use. You can help buy these for our Boys in the Solomons and elsewhere with your purchase of War Bonds. Join the Paratroops Savings Plan and receive a 10 percent bonus.

4 STEEL FACTS in one minute

Steel Water Have Risen 70 Years in Succession
 Last year with the best, average ton in which average hourly earnings of steel workers have increased by 47 percent. Total increase, 1923-1942, is 103 per cent.

Bare Feet Detected Fobbles in Clay for Crucibles
 Clay for the crucibles in which English steelmakers melted cast iron used to be tested often by bare-foot men to discover the presence of fobbles.

70% More Steel in 1942 Than in 1917
 American steel mills produced 70 per cent more steel in 1942 than they did in either 1917 or 1940, and over 10 per cent more than total output from April 6, 1917 to the Armistice.

 Tommy Howell, 1; James Moss, 1; Jack Greene, 5; Clyde Llaughter, 5
 Personal Health: Billy Moss, 1;
 Curtis Falls, Jr., 2
 Public Health: Billy Moss, 1; Curtis Falls, Jr., 2.

TRAINING COURSE
 All Boy Scout Troops were well represented at a Patrol Leaders Training Course held at the Troop No. 4 headquarters in the old Dilling mill office Sunday afternoon. Present were more than 20 leaders including Scoutmasters, Assistants, Troop Patrol Leaders and Cub Den Chiefs. Selected to lead the Course as Troop Scoutmaster was Carl Davidson, assisted by Aubrey Mauney, and H. C. Wilson. Patrols were organized and scouting patrol organization and activities were discussed.
 The Course is to continue each Sunday afternoon at 2:30 at the same place until ten hours training work is completed.
 During the course there will be one outdoor hike program.
 As a part of the course each troop will be reorganized using the Patrol System and home-troop projects at each Scout Troop meeting will be undertaken.
 All Scout leaders are urged to participate.
 Camden County growers have received a cooperative shipment of 128,000 pounds of Impedum seed, reports Assistant County Agent F. D. Allen.

State College Advises To Farm Housewives
 (By Ruth Current, N. C. State Col.)
 There's a little question on washing a refrigerator that has bothered more than one beginner at house-keeping. "When the directions for a refrigerator or an ice chest call for washing with warm water and soda, does this mean wash with soap or baking soda?"
 The answer is baking soda or sodium bicarbonate, as it is sometimes called. Use one level tablespoon to each quart of warm water. Washing soda is too strong, both for the finish of the refrigerator and for your hands. When you defrost a mechanical refrigerator, it is a good time to clean it. After the frost is all melted, take everything out, including the shelves.
 Make the soda solution and wash the interior of the refrigerator or freezing unit. Be sure to wash the shelves of melted frost.
 Clean every part of the inside of the refrigerator in the same thorough way. Clean all the shelves, fruit baskets and the vegetable crisper. Never use harsh, scratchy cleaning powders on the ice cube trays, or on the rubber gasket. You can wash these things with soap and water. Rinse, and wipe dry. If anything spills on the gasket, wipe it off at once. Take care not to scratch or scuff the rubber.
 After you finish cleaning, turn the control back to normal. Fill the ice cube trays to within a quarter of an inch of the top with fresh cold water. See that all containers are clean and dry as you return them to the shelves. Work fast to keep the refrigerator as cold as possible.
 There will probably be an additional cut of 10 percent in Print Paper on April 1 to meet conditions caused by the war.
