NEIGHBOR NEWS
By Mrs. Jessie G. Costner

A World Service program was given at St. Paul Methodist church last Friday evening, sponsored by the Rev. G. M. Phelps, district superintendent of the Western District of the North Carolina Conference. Supper was served before the program. The sermon was delivered by the Rev. J. E. Brown, pastor of St. Matthews Methodist church, Greensboro, N. C. The entire program was enjoyed by all who were present.

Mrs. Sara Brooks of the Compact community was a visitor at St. Paul Methodist church last Sunday morning.

Private Melvin E. Jackson, son of Mrs. A. F. Jackson of Gander street, is stationed at Fort Clark, Texas. His address is Dry. A. 7th F. A. St., Fort Clark, Texas.

FOOD SURPLUS

The economic well-being of the American farmer after the war is of government importance to the whole national economy. The productive capacity of American agriculture in the years immediately after the war may be the means of preventing starvation in large sections of the world.

In the event that the United States should have a surplus of food products above the requirements of its own population after the war, and if there is drastic temporary need for such food products in certain war-ravaged foreign countries, then it would be logical and desirable for the United States to ship promptly its own surplus to such countries, under such terms of settlement as the circumstances may warrant.

PRODUCTION CAPACITY UP
In the 1943 U. S. industry will have a yearly machine tool capacity of \$1,400,000,000. Electric power capacity will be up 25 percent, steel capacity up 30 percent, aluminum capacity will be five times as great, and magnesium capacity one hundred times as great as in the pre-war period.
