**Unique Recipe**

A unique recipe is added to the art of "Southern Cooking" in a recent statement by Ernest K. Norris, President of the Southern Railway System. Mr. Norris recommends "Pineapple" as an abundance of natural resources and raw materials. Pineapple is a potential supply of power and intelligent labor. Then add a ready, efficient transportation system.

The result:

"Southern steel mills, shipyards, textile mills, airplanes and chemical plants, industries of every sort that will hasten the day when freedom once again returns to the people of Peace. And when that day comes "Southern Cooking" Victory style will be ready to supply the builders of the brighter world that surely lies ahead."

**"I GET A REAL KICK OUT OF MY VOLUNTEER WAR WORK"**  
—Said a Mother!

Ever since Pearl Harbor, she has wanted to do a few hours of volunteer work each week. But her home duties, plus her washing, kept her tied down. One day she called us! Now, she has had one little laundry chore each week—making a list of the items and checking them when we deliver the spotlessly clean bundle. Why not follow her program?

**IT'S NO PIPE DREAM, BUDDY**

No doubt about it, it's tough when you have to stand up to risk. But don't think you've gotten a true picture of bus travel now. I've been driving many years and know how folks really enjoy a bus ride under normal conditions.

And after we give the ax to the Axis, I'll show you real travel pleasure, with encouragement, more comfort and service than ever before.

That's no pipe dream, and here's hope that happy day will come—soon.

**NO ARMISTICE TODAY**

**TWENTY-FIVE years ago this world went wild with joy. The world cried "Peace". But there was no peace. There was only a truce.**

This time there must be no truce. This time we are grimly determined to see the job through. We will make whatever sacrifice is necessary. We won't let it happen again.

Armistice Day this year marks the beginning of a new call upon our patriotism. A call directed especially to the people of this community.

One of the greatest threats to our safety is a shortage of pulpwood.

wood-cutting areas are asked to make good that shortage. We will be paid for our wood, of course. But we are asked to do it as our special part in the war—backing up our own boys in the service.

In whose honor will you cut your cord? A cord? A brother? A friend? Give us his name, and yours, so that both may be entered on the roll of honor. No boy shall die because we failed.
