Making Your Own Accessories Means War Bond Money Saved

The fashion for spring and summer. This light-as-a-heron cotton ensemble is a gay accompaniment to your wardrobe. It is easy and simply made. Making your own saves and extra War Bonds bought. Directions and bag set may be obtained by writing a stamped card to the Needlework Department of the U.S. War Relocation Authority.

Government Insurance Policies

ATLANTA (AP)—An average government insurance policy for a year is \$6,691.86 in April a year ago. The limit of government insurance that can be issued a soldier is \$10,000.

Two of the reception centers, Fort McPherson, Ga., and Camp Shelby, Miss., were 100 percent in the number of men applying for and receiving the insurance, while Fort Benning, Ga., and Fort Bragg, N. C., each had a record of 99.99 percent, one man inducted at each post failing to take insurance and spoiling the perfect record, the April report shows.

This compares with 99.85 percent taking insurance for an average policy of \$6,691.86 in April a year ago. The limit of government insurance that can be issued a soldier is \$10,000.

State College Hints To Farm Home Makers

(Both Current N. C. State College) Do your part in preventing home accidents and sickness.

1. Prevent home accidents by removing hazards.
 2. Be careful while doing every task. Dress suitably for your work. Use the right kind of equipment and use equipment properly.
 3. Avoid exposure and over-fatigue.
 4. Eat some of all the "Basic 7" foods every day. Good food keeps us physically fit.
 5. ("First Aid Kit" should be in every home. Simple ailments should be treated promptly.
 6. Take the Red Cross first aid course in home nursing and nutrition, if you have an opportunity. Hospitals are full of sick people. Doctors and nurses are scarce.
- Washing each green or spinach, turnip greens, and mustard, in slight warm water helps to remove grit and makes the bugs and worms that might be clinging turn loose.
- To prevent all chicken top corrosion, remove tops from the cell chutes, invert and pour melted paraffin through them. Enough paraffin will adhere to coat the surface and holes may be opened with a needle. This lasts indefinitely.

The "hardware disease" of cattle is caused by the animals swallowing nails, staples, pieces of wire, and other sharp scraps of metal. The remedy lies in keeping feedlots free of harmful metal objects.

SATISFIED

SERVES 2

DOUBLE COLA

To The Citizens Of Cleveland County:

I want to thank you for the confidence placed in me during the time I have served as Register of Deeds. I leave it to you whether I have betrayed that confidence or not.

I have tried to give the same prompt, efficient and courteous service to the poor as I have to the rich. No charges for such services, in recording or issuing any papers, have been collected except those required by law or fixed by the Board of County Commissioners; and every cent of money so collected has been turned over to the Treasurer of Cleveland County. I get no fees except my salary. And for one term I did not accept my full salary—after I was elected my salary was increased, and I paid back to the county the increase for that term. And in order to serve the people of my county better, I have always kept the office open during the noon hour.

On account of the necessities of war I have felt that I should not use gas and tires with which to make a personal campaign this year. But I do want to say to the fathers and mothers who have boys and girls in the armed forces, and to the boys and girls themselves, that my heart goes out to them. You will understand me when I tell you that my oldest son was wounded while in the line of battle in France during the first World War, and after its close lingered for many years in the Veteran's Hospital at Oteen, where he died—a casualty of the war. And during this trying period, in which there is a shortage of man power, I want to serve my country in the place and manner for which my training and experience best qualify me.

I am grateful to you for your loyalty to me in the past; and if by your votes you will express your confidence in me again at the election on May 27th, I shall show my gratitude in the services I shall render you.

RESPECTFULLY YOURS,
ANDY NEWTON

A Legionnaire's Open Letter To Gregg Cherry

May 16, 1944
Winston Salem, N. C.
Honorable R. Gregg Cherry,
Raleigh,
North Carolina.

Dear Gregg:

It was my pleasure to serve in France with you in World War I in the 30th Division. Of course, as you know, I was in the 105th Engineers and you were Captain of the 115th Machine Gun Company. I recall as if it was yesterday when we were building concrete machine gun emplacements in "no-man's" land near Ypres, Belgium.

As you remember, this work had to be done at night as we were under observation and range of the German artillery and also machine guns. I remember the many nights while we were at work that you would come out and inspect and advise us in the construction; and also as soon as one emplacement was completed, you and your men would move in. I know that never a night passed but that you visited each and every one of these emplacements, looking to the welfare and comfort of the men who served under you and my comrades who were helping construct these emplacements.

I had the opportunity time after time to talk to the men who served in your command, and I know that they held you in the highest esteem; that they felt like at all times you were looking after their well-being; that no task was too menial, but that you would take hold and help them out and that you had the interest of every man in your command at heart. The test of a good commanding officer is the esteem in which he is held by his men. You oftentimes exposed yourself to danger beyond the call of duty to further the well-being and the interest of your men, and it is my judgment that after talking with numerous men in your command and seeing you in action on different occasions, that the spirit you engendered by your leadership added greatly to the success of your Company and undoubtedly saved many lives and was in a large measure responsible for the wonderful record that your Company made on September 26th, 1918, in the breaking of the Hindenburg Line.

It might interest you to know that my boy, Lieutenant Bill Rierson, was recently shot down over Germany while flying a P-38 and is now a German prisoner, and I believe that I know something about what War means; and I further believe that your experience as a soldier and as a leader, together with your experience in serving seven terms in the Legislature admirably fit you to meet the problems of the returning soldier from this War. I also know that thousands of mothers and fathers feel about this as I do.

With best wishes to you for your continued success, I am,

Sincerely yours,
J. BRYAN RIERSON,
Member of the 105th
Engineers Company,
30th Division.
