NORTH CAROLINA WEEKLY ROUNDUP

ORGANIZE FOR FOOD AGRICULTURE

An international authority that would provide international agricultural credit is one of the proposals of the United Nations Interim Commission on Food and Agriculture in its report recommending that a Food and Agriculture Organization of the United Nations be set up. The FAO, proposed to 44 Governments for their acceptance, grew out of the United Nations food conference in June, 1942. Other functions the FAO would include are: to collect, interpret and disseminate information relating to food, nutrition and agriculture; to recommend a plan with regard to research, education, administration, conservation, agricultural production, processing, marketing and distribution of agricultural products; to furnish governments with request of technical assistance.

DAVIS ASKS TOOLS FOR FIGHTERS

Speaking by radio from Honolulu, Hawaii, after his return from Saipan and Guam, Elmer Davis, Director of the Office of War Information, cautioned the American people that while American generals and admirals "have out-thought the Japs on our rank and file have outfought them in spirit and in the air... our fighting men need stuff to fight with, stuff we must go on producing at home in ample quantity no matter what may happen elsewhere, no matter how it might like to get back to the familiar ways of peace... Our fighting men out here have written a record of which every American ought to be proud. Give them tools and see that the tools get to them over thousands of miles of land and sea and they'll finish the job."

MENUTT NELSON ON RECONVERSION

In a joint statement on the reconversion from war production to civilian production, Donald M. Nelson, chairman of the War Production Board, and Paul V. McNutt, chairman of the War Manpower Commission, declared that "wherever labor and materials are available which are not needed in, or cannot be made available for, war production they should be employed in civilian production" and that planning "should go forward... so that, as employment in war production ends, jobs in civilian production can be readily found."

CAREFUL—DON'T TRY THIS

Don't give away, sell or destroy that coal or wood-burning equipment you have just in order to get a fuel oil ration, because OPA has authorized local rationing boards to withhold the ration under such circumstances.

EASY STORAGE OF VEGETABLES

Any fruits and vegetables available in the fall can be kept for a few weeks in a garage or on the back porch if they are used before freezing weather sets in, the Department of Agriculture says. Where winters are not severe, apples and pears can be kept by setting the containers on a thick layer of newspapers and covering with old rugs, carpeting or newspapers. If matured and thoroughly cured, onions will keep for several months in an attic or an unheated room where temperatures stay above freezing. Potatoes may be stored in dry cellars. In any storage, they should be protected against light. Potatoes should be kept in barrels or bins to reduce loss of moisture and they do better in temperatures of 50 or 60 degrees than if stored at 40 or below.

WOMEN GET MOST CITIZENSHIP

Of the awards and citations given to a total of 105 women in the U. S. armed forces to date, 97 women of the Army Nurse Corps got the lion's share, OWI reported on the basis of information from Army and Navy. The Distinguished Flying Cross, highest award ever made to a woman, went to a flying Army nurse in the New Guinea.

PLAN SCHOOL LUNCH PROGRAM NOW

Before school opens committees should plan their school lunch program, the War Food Administration says. First step is to organize parents, teachers and representatives of civic organizations to discuss the number of children to participate and facilities and financial assistance available. If the group finds the community is unable to act or is without financial assistance, the official sponsor, usually the board of education or the state department of education, may appeal to WFA's Office of Distribution. A federal fund of 20 million dollars is available for the school lunch program during the 1944-45 school year, funds to be used exclusively for food purchase.

LESS NITROGEN FERTILIZER

American farmers will have less of nitrogen fertilizer as a result of the restricted supply of nitric acid, now critically needed by wartime plants, WFA says. Some of the loss may be offset if arrangements can be made to import larger amounts of Chilean nitrate for agricultural use.

DOES ANY FRIEND IN AUSTRALIA

Young boys, if your boy friend is in Australia, you'd better write him today... every day. The Australian News and Information Bureau

says that an estimated 10,000 American servicemen in that country have married Australian girls. The more than 7,000 marriages registered with Australian authorities in 1943 are the most in any one year.

TAKE YOUR OWN SHOPPING BAG
When you go shopping, you can save your own bag a little if you take your own shopping bag or use your own paper bags home unwrapped because WPA reveals that this year less than half as much paper for retail wrapping and paper bags is available than during a normal year. WPA has asked merchants to wear

When GI Joe comes home, County Agricultural Workers Councils and the Extension Service will be ready to lend a helping hand to those he brings to return to the farm.

Because of the present critics! tire shortage...!

Please DON'T TRAVEL OVER LABOR DAY!

In the whole period of the war this Labor Day will be the most critical for transportation. Intercity buses simply cannot carry all the people who will need or want to travel —hundreds of thousands of these buses are temporarily standing idle, without tires.

Your help is needed in meeting this crisis. Even if your Labor Day trip is highly essential, postpone it a few days if you possibly can. If you must go, please be prepared for possible delays and unavoidable crowding.

Nothing would give us greater pleasure than to serve you now—but the urgent needs of war come first. We know you will understand and cooperate as you have always done.

We feel sure that it won't be long until all our buses are back in service. With a proud war record behind them, and an urgent job of transporting manpower still ahead, America's buses must be kept rolling!
