Booby Trap

In public speeches, in published articles and in this column since early January, 1944, I have been calling attention to the "booby trap" in America's wartime tax laws. Now, as our fighting men press harder upon Berlin, the industries that support them are drawn closer to the trap. Most war contracts will be voided on V-Day but taxes and payrolls must still be met.

Corporations pay income tax each year on the previous year's earnings, just as personal income taxes were paid prior to 1944. In 1946, firms will be taxed on 1945's earnings. But if war ends (terminating war contracts) this year, 1946 will be the year of change-back, of costly sales and few. Problem: How to hire more men and pay 1945's taxes with small earnings or none?

Apple-Polishing?

Any time a voice is raised in the interest of American business, any time a writer suggests that corporation tax laws need revision, somebody accuses him of apple-polishing or grinding the axe of big business. But right is still right. Prosperity in America depends on full employment; full employment depends on business expansion, and business expansion depends on wise tax provisions.

Firms that have used their war-year profits expanding production for victory are not to be blamed. They are solvent. They will have adequate working capital due them under the present law after their Refund Bonds are cashable and after their Carry-back credits on excess profits taxes are allowed. But when will this be? As the law is written now, years will pass before the money comes.

Keep Jobs Alive

After a man has starved to death, food does him no good. Neither will money due a firm help its employees after bankruptcy. What war-production firms need is money when they need it; to hire men, to buy machinery for peacetime work, to save useful enterprises and avoid wholesale unemployment in their communities. Laborers and farmers and small-town merchants have the most at stake.

A serious shortage of stove and furnace smoke pipe is apt to develop this year, industry representatives have warned the W.P.B.

Rupture

Mr. E. J. MEINHARDT, widely known Shield Specialist of Chicago, will again be in Charlotte, N. C., at the Charlotte Hotel, Thursday, Friday, Saturday, and Sunday, April 19th, 20th, 21st, and 22nd. Office Hours 11 A. M. to 5 P. M. daily.

MR. MEINHARDT says: The Meinhardt Shield is a tremendous improvement—well known for producing immediate results. It prevents the Rupture from protruding in 10 days on the average—regardless of size or location of Rupture and no matter how hard you work or strain. It has no lag straps. Mr. Meinhardt has been coming here for 15 years. He has thousands of satisfied customers. Ask your neighbors.

Caution: If neglected—Rupture may cause weakness, backache, constipation, nervousness, stomach pain, etc., or sudden death from strangulation.

Men having large Ruptures which have returned after Surgical Operations or Injection Treatments are also invited. When all others fail—see MEINHARDT. He will be pleased to demonstrate to you privately without charge. (Only men invited.) White only.

Where is NORTH CAROLINA'S PULPWOOD?

Pulpwood is the No. 1 bottleneck of war production. North Carolina is one of the chief pulpwood-producing areas...and North Carolina is not producing as it should. The situation here is so bad that some mills may have to shut down for lack of Pulpwood.

What Are You Going To Do About It? Pulpwood Always Will Be In Demand

If you have any suitable woodland of your own; if you can cut and haul pulpwood from someone else's land; if you can take even a part-time job in the woods, you have an opportunity to help shorten the war and at the same time put yourself in a fine peacetime business.

The greatest source of increased pulpwood production so far has been the farm woodlot, and it is to the farmer we must look now for help in meeting the present emergency.

The present huge demand for pulpwood is due to the war; but it isn't going to stop when the war stops. Many new uses have been developed for pulpwood for which there is a waiting civilian market.

Pulp and paper—already the nation's 6th largest industry—has a great post-war future. Pulpwood is the basic raw material for many of the new products that are coming. It will be a good business for you to be in after the war as well as today.
