### THE FUTURE BECKONS

With a Busy Hand!

Now THAT the war is over, it's time to open the doors to the days ahead. They're going to be busy, exciting days.

For one thing, the Telephone Company plans the greatest expansion program in its history in North Carolina—aimed at meeting the telephone needs of a great state.

It means providing telephones for all who have been waiting for them. This is one of our first jobs! A greatly expanded telephone program for our farmer friends is also in process. Expansion of long distance service is being scheduled too. It will include the installation of coaxial cables to handle more calls with speed and convenience for you, and provide more facilities for that exciting visual art—television. A mass of construction is to be done and a new service to motor vehicles is also in the offing.

Those are the high spots. They have been ideas on the drawing board. They will become realities as materials become obtainable. There will be the marshalling of property's Three M's—Men, Money and Materials, the forces that brought North Carolina and the Telephone Company to their present positions, that won them the friendship and confidence of the public.

This expansion program calls for the expenditure of millions of dollars in North Carolina. And telephone people like the idea of putting money for expansion into North Carolina, contributing to the general welfare and prosperity of the state, through its men and women, its wage-earners, its families, its communities.

Our optimism for the future is based on the record of the past. North Carolina and the 5712 men and women of the Telephone Company have grown up together and prospered each year. Now, in the days ahead, the same friendly relationship will continue. The future beckons with a busy hand.
