**Soil Conservation News**

(By Joe N. Craver and W. I. Shope)

Herman A. Beam of Fallston community operates several farms, is taking advantage of the natural draws to dispose of terrace water from his terraced fields. Mr. Beam follows the recommended practices of seeding these natural draws to grasses, lespedeza sericea and planting them to kudzu. Not only will these natural draws serve as a water disposal area, but will produce excellent hay crops. Mr. Beam says, "A meadow water ways is much more desirable on my farms than these grown-up line ditches and washed out, ugly gullies. I have never realized any profit from a gully or a line ditch and I have harvested some mighty good hay from my meadow strips."

Wayne L. Ware, Cleveland County's supervisor for the Broad River soil conservation district, has seeded a large acreage of his cultivated land to crimson clover. Mr. Ware harvested the seed on his farm this past spring. He says, "I am seeding every acre to a winter cover crop that I can get in. Our soil needs protection during the winter months and we need more humus matter in our soil."

The following farm fish ponds will be stocked with bream and bass within the next few weeks: S. S. Mauney, Tom Cornwell and James Cornwell. These farmers are co-operating with the Broad River soil conservation district and their ponds were constructed according to the recommended practices of the district. They will also follow the practice of applying fertilizer to their ponds each year. A fertilized pond will produce considerably more pounds of fish per acre than an unfertilized pond.

**HEADACHE**

Capudine quickly eases headache and soothes resulting upset nerves because it's liquid—nothing to dissolve. Use only as directed.

H. Y. Belk

Howard Parrish from Washington visited his father this week end. George Shipman called on this reporter last Wednesday.

We are glad Henry Gregory is improving in the City Hospital, Gastonia, after being in a dangerous wreck.

Mrs. Bob McDanel, after being confined to the hospital for some time, is much improved.

Mrs. Belk and little Susie Lingerfeld are visiting her brother in Charlotte and taking in the fair.

Its a fact—they read the Herald in the Capitol City up at Washington. Why does a ghost always come prowling around after night? I have yet to meet one after day light.

I overheard two colored madams worrying about the laundry situation. One lady replied, Well, sister, my laundry don't fetch me no frowns. My old man don't buy me no clothes and he stakes all of his in the pawn shops.

I love to hear Earl Armstrong preach because he's a 20 mule team. He makes the devil hide out.

I met Pat the Irish man from the Margrace. He told your reporter that hog raising is his life time hobby. He ought to have a medal pinned on him for growing mammoth hogs.

Charlie Warlick tells me the funniest business he ever had was clerking for Glee Bridges while Glee runs the county. I don't see anything funny about it. Maybe Charlie's looking for a promotion.

What makes Congress always fussing about doing something and never does anything?

Washington, when 5 million War Dads march into the capitol there will be smoke on the land—it will happen as sure as God made G. I. Joes.

Now the wonderful news comes in that the OPA has lifted the control on vinegar. Who cares for pickles anyway?

I passed a little boy going to school not over seven years old smoking a cigarette. I asked him where he got that duck. Mister, it's none of your business. I'm taking care of this cigarette.

A dog has four legs. One on each corner. He usually uses them mostly after night.

A little girl coming down the street asked my for a nickel. I asked her what she wanted with money. I want to get me a peppermint. Ma, she got her one.

There are three H. Y.'s in Kings Mountain—H. Y. Farr, H. Y. Ballard and H. Y. Belk. They don't need any introductions—good boys.

Honorable Claud Webb says everyone can play baseball that wants too, he's done throwing money away on games.

The phone rang and Mrs. Bitter stumbled over her dog, fell through a glass top table, then learned of the call was from an insurance salesman trying to sell her a home accident policy.

A school teacher asked me where I got all the funnies I wrote in the papers. I told her I got it out of my head. H. Y., she replied, you must be out of your head.

Running to the scene of an explosion in Boston John Cook fell into an open manhole whose cover had been blown open by the blast.

Now, in closing I want the nation to take notice that I am 100 percent for the Salvation Army.

And that's all.

**Relief At Last For Your Cough**

Cremulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Cremulsion with the understanding you must like the way it quickly relieves the cough or you are to have your money back.

From "V" to "E"

The indicator that points to primary objectives on Uncle Sam's dial moved, August 12, from Victory to Employment. Correctly this nation's first aim from December 7, 1941, to V-J Day was to win the war and save the world's free peoples from despotic rule; worth all it cost in blood, sweat and tears. Now that's finished, and the new primary objective is to hold what's been gained.

Damages have been fearful. Some never can be repaired; some can. There are twisted minds and broken hearts, wounds to heal and debts to pay. Those losses that can be won back will demand much time and patience. By their very nature, they are deferred. But unemployment is another aggressive enemy, not to be put off. We provide work now or lose what our young men bought with their lives.

**Something to Avoid**

Mass unemployment in this country might easily start a revolution among industrial workers that would overthrow the republic and destroy our very American way of life. It is the one catastrophe to be feared by the whole people of America. War's end touched off much talk about post-war legislation but all of it is relatively unimportant except what has to do with gainful employment.

Legislative acts that merely promise work to service men are nothing but emotional brainstorms. Jobs have to pay their own way to be worth having. Since 15,000 men will lay down arms every day for 14 months, one of three things must happen: (1) Private industry must expand and make room for them, (2) Government will make a big WPA for them or (3) Want will bring desperation.

**Good Tax Laws First**

A hungry and outraged people rush mob-like to dictatorship. An army-size WPA marches with slave-like steps to the same destination. Well paid jobs in private industry with opportunity for improvement and advancement constitute the only work fit for a free people. It is the only solution worthy of America's clean record. Industry must expand and make jobs. It is the only way to remain free.

Only one thing stands in the way—taxes! Expanding industry, enough to make the needed jobs, calls for investments which (same as jobs) have to pay. Today's taxes, however, make it impossible to find a paying investment that will make jobs. The tax laws were all right in 1940 when they were passed to take the profit out of war. Now they threaten to ruin our future by taking the prosperity out of peace.

**A Simple Tax Plan**

It is my conviction that corporation taxes and standard individual taxes should be levied at the same rate. I think the structure should be high enough to meet the requirements of the proposed budget without having any surtaxes higher than 50%. For an investor to pay out more than half his income in taxes will discourage large investments—the very kind needed.

With a few specific exceptions I oppose excise taxes and consider it wrong in principle to tax distributed income of corporations more than once. Excess profits taxes should be eliminated immediately. A fair tax policy, and certainly an expedient one, will encourage capital investments for profit in going concerns rather than in government bonds. We want the right taxes for the most jobs.

The average lease taken out on land considered prospective for oil production in the United States is either tested or the lease surrendered in less than four years.
