**Ford Announces Price Reductions**

The Ford Motor Company last week in a move to halt the spiral of mounting costs and prices, reduced the price of every Ford car from \$15 to \$50.

In making the announcement, Henry Ford II, president said, "Although more than one million of our customers are waiting for delivery of their cars at present prices, we are immediately reducing the price of every Ford car—some models as much as \$50. This is a down payment toward a continued high level of production and employment in the months ahead. We believe that the shock treatment of prompt action is needed to halt the insane spiral of mounting costs and rising prices and to restore a sound base for the hopeful period of our new production program now entering."

The price reduction was disclosed in a press conference at Dearborn in which the entire policy committee of the Ford Motor Company partic-

ated. The new price scale was wired simultaneously to Ford dealers throughout the nation effective immediately.

Mr. Ford said the company had made a modest profit for the last three months of 1946, and intended to continue to operate in the black. He said that the millions of dollars lost since V-J Day had been accepted as "an item of the cost of a great and victorious War."

"Because they must build up depleted cash reserves or because they are still losing money, many businesses may not be able to follow suit," he said, "but we hope that our suppliers, our employees, and our other economic partners will back, each to his own ability, our attempt to return to the economic pattern which has helped to make America great—the principle that higher wages and a higher standard of living for all depend upon lower costs and lower prices through increasingly efficient large scale production."

The new Quartermaster designed ration gives the soldier a choice of ten kinds of meats and four kinds of fruit items in addition to other foods.
