

Murray Markets Cream Shampoo

Within the next few days many local store counters and shelves will be adorned with another Cleveland product, the county's first patented cream shampoo.

Mack's mentholated Cream Shampoo, which retails for 50c for a 3-ounce size jar, is a product of Murray's, Kings Mountain cream manufacturers, and is sold under a money back guarantee.

It is now ready for the market, after over one and one-half years' research. The base of Mack's Cream Shampoo is Menolin, the miracle skin oil, approved by the medical association, which was first introduced locally in Mack's Shaving Cream. The menolin, with other active ingredients, tends to clean and condition the hair, while removing those dandruff and excess oil, cleaning and stimulating the scalp. Mack's, being safe for any hair, leaves the hair fragrant, soft, clean and manageable.

Though prepared especially for ladies, it is also recommended for use by men and children.

For the past several months, it has been in constant use in a Shelby and a Kings Mountain beauty parlor where it has met wide acclaim from over 100 different ladies.

A. who did so much for us during and after the war.

Thanking you, Yours faithfully,
