

WIN'S WATCH—Shown above is Arnold Jackson, right, well-known Kings Mountain man, who is receiving a Gruen watch from Charles A. Goforth, Jr., of Dellinger's Jewel Shop, Dellinger's, local Gruen dealer, is making the presentation on behalf of the company after Mr. Jackson was awarded the watch on a recent NBC jackpot show, "Hollywood Calling." Mr. Jackson was called during the show by Ann Sheridan, movie star who was a guest on the show along with George Jessel. Had Mr. Jackson been able to identify the "film of fortune," he would have won a \$25,000 jackpot.

Early spring flowers and greenery were used as decorative features in the party room.

Miss Frances Payne held high score, Mrs. A. A. Lackey, Jr., low score, each were presented attractive gifts.

The hostess served a very tempting sweet course.

Brownie Scout News

Troop 14 Brownie Scout Troop No. 14 met in our room in the Lutheran church. We elected new officers: President: Becky Blanton; Secretary: Judy Cooper. We planned our program for the next six months and a budget by letting everyone write what they wanted to learn to do. Then we went up to the kitchen and made fudge. Phyllis Dean brought her record player so we played records while the candy cooked. Judy Cooper brought her telegraph set and showed us how it worked. Becky Blanton.

Case Tractors Have New Hitch

Tractors equipped with a new 3-point hitch and hydraulic equipment control have been put on display by Community Implement & Supply Co., at Kings Mountain.

With this new "Eagle hitch," a plow or any one of a variety of rear-mounted "latch-on" implements can be hitched or unhitched in a minute or so, with no need for the driver to get off the tractor seat, Lewis Hovis, manager, declares.

He described the new hydraulic control as "practically fool-proof," since it is not subject to air locks and is entirely independent of clutch and power take-off. Mounted on the engine, the self-priming pump operates whenever the engine is running. Implements may be raised and lowered regardless of whether the tractor is traveling or standing, in gear or out. The hydraulic fluid supply is never a problem, he said, because the unit uses ordinary motor oil.

A single control lever near the driver's right hand raises and lowers any "latch-on" implement. The design of the "Eagle hitch" itself keeps the implement working at uniform depth in spite of rough ground or hard or soft spots in the field. A short movement of the control lever will change implement settings to meet unusual field conditions without stopping or slowing the tractor. A handy turn-buckle sets plow depth for normal operation.

Mr. Hovis said that the low-cost two-plow "VAC" Case tractors now carry the new hitch and hydraulic control as regular equipment.

He will have plows and other "latch-on" implements of types used in this area.

WANTED: 12 fresh cows, 3 and 4 galtons, young, J. L. Hallman, Route 1, Kings Mountain, N. C. j-6-27-pd.
