Teachers To Be "Glamorized"

RALEIGH. — The high qualities and qualifications most desired in the teacher-of-tomorrow will be evaluated for the first time in North Carolina as a state-wide program to "glamorize" the teaching profession gets underway.

The Division of Higher Education and the Department of Future Teachers of America, under the sponsorship of the North Carolina Education Association, and the State Department of Education have inaugurated this program in an effort to publicize the positive side of the teaching profession.

Dr. Elizabeth Welch of Salem College, president of the Division, writes that its primary purposes

are: (1) to erase from the minds of prospective teachers the thought that teaching has only a debit side; (2) to have high school boys and girls feel that their teachers consider it a privilege and an honor to teach them; and (3) that the teaching profession offers deep and abiding pleasure.

It is hoped that this state-wide project will not only aid in the recruitment of teachers, but that it will also inform the public of what is being done in colleges today to improve the quality of teaching and to make certain that the best possible teachers are recruited.

During the next two months, the students and faculty of teacher-training institutions over the state will stress the importance of the program by conducting an evaluation campaign to choose a representative Mr. and Miss Student Teacher from their campus. Those selected as possessing the qualities most desired in future teachers will be presented to the members of the North Carolina Education Association at their meeting in Raleigh, March 9-11.

The Future Teachers, under the direction of Beverly Johnson, state president, have greatly aided in promoting the project and will guide the campaign on their respective campuses.

Qualifications being considered include personality (intelligence, reliability, adaptability, leadership, creativeness, enthusiasm, integrity, sense of humor); essential understanding (general cultural understanding, understanding of children, school's purposes, problems, and operation, and understanding of the principles of effective human relations); professional competencies (discovering pupil needs, working creatively with colleagues, administrative duties, speech and written expression); and professional attitudes (eagerness to

1950 Ford Winner Of Academy Award

NEW YORK — The Fashion Academy Gold Medal Award for outstanding design and fashion styling of 1950 automobiles has been awarded to the 1950 Ford, it was announced today by E. A. Hartman, Director of the Academy.

This is the second consecutive year the Ford line has been selected by the Academy to receive the award.

The Fashion Academy, a New York school of fashion design, has become internationally known through the years for its annual selection of "America's Best Dressed Women," and more recently for its annual award in the automotive field to "America's Fashion Car For The Year."

The Ford line was chosen to receive the award again after 1950 automobile models of all ward day-to-day work of the classroom teacher, interest in professional introspection and improvement and respect for professional ethics.

This instrument of evaluation was established by a committee appointed by the Division of Higher Education. Dr. C. M. Clark, University of North Carolina, served as chairman; other members were Dr. B. G. Childs, Duke University, "father" of the idea; Herbert E. Vaughan, Jr., principal of Curry School, W. C. U. N. C.; Dr. Harold M. Baker, Eastern College; and Dr. Welch. An advisory committee included Miss Johnson and Professor Chappell Wilson, Appalachian State Teachers College.

Holly growing offers a good chance for some farmers to make profitable use of land too steep for safe cultivation, says the Soil Conservation Service.

makes and in all price ranges were studied from the standpoint of excellence in design, simplicity and feminine style appeal. Mr. Hartman pointed out. He said the award last year to the 1949 Ford, and again to the 1950 model, marked the first time the Gold Medal was awarded to a car in the low-price field.

Insurance Dividend Checks On The Way

According to Veterans Administration, the major part of the 16 million checks for the \$2,800,000 National Service Life Insurance special dividend will be mailed by June 30, 1950.

The first checks went into the mails January 16.

Veterans who have received acknowledgment cards after mailing in their dividend application forms can be assured they will receive their dividend checks before June 30. They are warned not to write to VA if they do not receive their checks at an early date, since reading and answering inquiries will only slow up the process.

The mailing of checks is being done by the Disbursing Office of the U. S. Treasury. The goal is to mail 200,000 checks daily for each five-day work week, or about checks a week.

Veterans Administration to date has received approximately 12,250,000 applications for the dividend, of which practically all have been acknowledged. However, says VA, about 25,000 of their acknowledgements have been returned by the post office because these veterans had moved from the addresses they gave in their applications, without leaving a forwarding address with the post office.

Approximately 400,000 World War II veterans have died since they took out their GI insurance. The dividend payments of these deceased veterans will be handled separately.

Dividends are to be paid on all National Service Life Insurance certificates that were held in force three months or longer, and the payments are based only on the period for which premiums were paid. The period covered by the dividends begins with the month in which each policy was issued and extends to the anniversary date of the policy in 1948.

Many Harnett County farmers are interested in growing sweet potatoes as a cash crop this year, says Farm Agent C. R. Ammons.

Light Defects Lead In Vehicle Check

RALEIGH. — Approximately one-third of motor vehicles inspected by the Highway Patrol in December were found to have light defects; the Department of Motor Vehicles reported today. A total of 89,203 vehicles were

inspected and 27,181 lights were corrected. Vehicle owners were issued 887 light tickets and 6,000 equipment tickets. Driver's licenses inspected numbered 91,550. Warning tickets issued totaled 2,910.

Patrolmen worked 125,389 hours and traveled 1,342,839 miles in the performance of their duties. A total of 1,459 accidents were

investigated in which 57 persons were killed and 668 injured.

The number of persons at work on farms in late November totaled slightly more than nine million, about the same as a year ago.

We take the Woes and Worries out of Weather

ONE of the grandest things about your Buick is the way you can ignore the season—chew your way through gravel and dust alike, splash through the wet stretches, snug and secure even on slippery pavements.

But bear this one thought in mind...

Rough road conditions call for special attention to your lubricants. Tires should be checked for correct inflation—for deep, clean tread that bites on a slick surface. Brakes won't stop you with a sure and gentle touch if the master cylinder needs more fluid, or if an air-bubble has worked itself into the line. These things, and more, should be checked to keep your Buick at its best.

If that sounds like more than one thought to bear in mind—just drive into our shop and tell the man, "LUBRICARE, please."

Our winter Lubricare treatment covers all these points—with specially trained mechanics following factory specifications as they go over your car from end to end.

Drive in this week, why don't you? The price is surprisingly low. The peace of mind is priceless.
