

Hill Toppers Stop Mountaineers Cold

Kings Mountain high school cagers were hosts January 24th to the top-running teams from the Western (Class A) conference basketball boys and girls circuits, Rutherfordton - Spindale high's Hill Toppers.

The "champs" got a small scare from a "hepped-up" bunch of Mountaineers (late in the third period they led by only 10 points, 38-28) but made the journey home with a pair of scalps, the boys by 58 to 30 and the girls, 55-26.

About five or six inches per player shorter on both boys and girls squads, the Central basketballers also could not match the Hill Toppers in speed.

Coach "Pop" Simmons of the visiting team said he had a rookie squad, only one forward and one guard returning from last year's varsity. But his lasses could match up in height with Coach C. N. Womack's lads. Maybe some to spare.

High scorers for Kings Mountain were Mary Lou Barnette, with 8 and Steve Jones, with 17. Jones played his most brilliant game to date, hitting with a one-hand push shot that had the vis-

itors worried until late in the contest. Kings Mountain wilted late in the third quarter and began playing a very erratic floor game and the visitors capitalized, widened the gap and stopped sweating.

High School Cagers Lost To Morganton

Kings Mountain high school cagers journeyed to Morganton on January 20th and the Mountaineers put up a whale of a scrap before dropping to the favored home-town boys by a score of 38 to 31.

The Mountaineers dropped the opener by a count of 43 to 26. The boys game was thrilling, with the Mountaineers jumping off from a first quarter 8-all deadlock to lead at half-time by 15 to 9.

The Morganton boys had the height, however, and controlled the rebounds during the last two periods. Third quarter score was 25-20 favor Morganton.

Center Steve Jones led the Mountaineer attack with five buckets and three free throws for a total of 13 points. Guard Stratton led the Morganton attack with six goals and a free toss for 13 points. Morganton's tall reserves were also thrown into the fray to wear the Mountaineers down on defense.

Audrey Byars led the Mountaineer's scoring with 10 points, three goals and 4 gift tosses. The first quarter of the girls game was a low-scoring affair and Kings Mountain came out on top with a 4-2 lead. Morganton gained during the second period and went out for the half-time rest period with a 12-11 lead and came back to wrap up the game in the third conto with 18 points against the Mountaineer's low of 4.

30 Years Added To Life Span In Past Century

The baby born in this country in 1950 can look forward to 30 more years of life than did the infant of just 100 years ago, according to the Institute of Life Insurance. While the expectation of life at birth was approximately 40 years in 1850, it is nearly 70 years today. The greater part of the gains have been the result of reduced mortality in infancy and early childhood.

Chief Gains in Early Life.
"Not only is the increased life span noticeable at birth, but all through childhood and up to middle life," the Institute commented. "At age 20, the increased expectation of life today, compared with 1850, is about 10 years; at age 40 it is about 5 years. By the time age 60 is reached, the benefits of medical advances and better living have just about run out, so that the expectation of life at ages beyond that is little different from that of 100 years ago. But the current emphasis in a large part of medical research such as that aided by the Life Insurance Medical Research Fund is on diseases which take the greatest toll at the more advanced ages. If the achievements of the past century at the younger ages is only partially paralleled in the efforts at the older ages, the 1950 babies can look forward to added expectancy at even the advanced ages."

Many More "Aged"
"The past century's health advances in the United States, adding materially to the lives saved in infancy, childhood and early life, have added greatly to the number of persons at or over retirement age today. Many millions more are today on the

threshold of 'old-age' than in previous generations and the aged are increasing at a greater rate than total population. Those 65 and over numbered only slightly over half a million in 1850; today they number more than 11,000,000. While the population has increased nearly seven times, those 65 and over have increased 19 times. In just the past decade some 2,000,000 have been added to the rolls and those 65 years of age or more.

"It is only natural, therefore, that millions of persons have turned to life insurance as a base for their retirement planning as well as for their family protection during the earlier years. The great bulk of the large volume of retirement income life insurance has been purchased in the past 25 or 30 years. And while annuities have been written throughout the lifetime of the life insurance business, it is in the past 30 years that they have had their major development. Today, there are nearly four million annuity contracts outstanding representing present or event annual income of well over a billion dollars. Actual current payments under these annuities are nearly a quarter of a billion

dollars. Only 30 years ago, these annuity payments were less than ten million dollars annually. As the country turns into the new half century, there is even greater interest in pension planning. There will probably be a great increase in the numbers of persons covered by pension plans in the years ahead. The one great concern involved is that this future increased development of retirement plans be kept sound."

HEARS AGAIN FOR ONLY \$1.50

A Hartford City, Indiana man says, "I have been troubled with my hearing for thirty years. But, GURINE changed all that and I hear again. Yes, you too can hear again if you are hard of hearing because of hardened, excess ear wax (cerumen) which can also cause itching, ringing, head noises. GURINE, an AMAZING, SCIENTIFIC discovery, is NOW ready for your use. The GURINE home method will quickly and safely remove your hardened, excess ear wax in just a few minutes in your own home. Get GURINE today. No Risk. Four money back if you do not hear better at once. We recommend and guarantee GURINE."
