Man Cuts Police Tires; Draws Fine

Nine cases were heard in regular weekly session of City Recorder's court held at City Hall Tuesday afternoon, April 11, a session highlighted by a case against one defendant for cutting tires of two city police cars.

W. M. Widenhouse, of Midland, was found guilty of injury to personal property, to wit cutting with a knife tires on two city police cars, and was ordered to pay a fine of \$100 and costs and was put on good behavior for one year not to violate the laws of the state during that time.

The incident took place on April 11 according to Chief N. M. Farr. Widenhouse, a stock car race driver, was awaiting release of two women from the city jail, Chief Farr said, and after the group left in a Cadillac automobile, police noticed that a tire on each of the patrol cars had been cut down. Charlotte police were alerted and stopped Widenhouse by blocking Wilkinson Boulevard with a tractor-trailer, Mr. Farr said. The man possessed a knife that "fit" the marks in the cut tires, he said.

John D. Snyder was bound over to higher court, under a \$500 bond on charges of breaking and entering and assault with intent to kill. Police said the man was discovered in the office of Phenix Plant, Burlington Mills, on the night of April 2 by the night watchman. Snyder reportedly pulled a knife and ran over the watchman and escaped. He was arrested in Kings Mountain on April 6.

Five defendants were convicted on charges of public drunkenness. Other cases included case against Roosevelt Jefferson, charged with improper lights, fined \$10 and costs, and case against Summie Oats charged with no drivers license, fined \$25 and costs.

Jack Lail Buys Registered Jersey COLUMBUS, O., — Jack Lail of Kings Mountain, N. C., has purchased one registered Jersey, Blimore Fillpall Lass, from the herd owned by 4-H Rotary Club

Foundation of Shelby N. C. Jerseys are registered at the national office of The American Jersey Cattle Club in Columbus, Ohio. The Club has kept complete records on all registered Jerseys in the United States since 1868. Jerseys are especially noted for producing milk that averages

more than 5 percent butterfat. The breed also calves and begins producing milk from three to six months sooner than other dairy breeds. This means faster herd building and earlier milk checks, and makes Jerseys increasingly popular with dairymen.

Only 15 years ago, nine farms out of 10 did not have electric service; today less than two out of 10 do not have electric service.
