Ni-Resist resists corrosive attacks of acids, alkalis and salts to a degree unmatched by any other products of the cast iron foundry. In strong corrosives it has 20 to 200 times the resistance of plain iron and 5 to 50 times the resistance in mild environments.

Through a recent change in the Canadian Precious Metals Marketing Act, palladium articles made of that precious metal must henceforth carry markings of the actual metal fineness. Palladium is a by-product of nickel refining and is produced in great quantity in Canada.

Club Meets

Davidson High School News
The members of the Davidson high school family have gotten off to an excellent beginning of another successful school year. We are very happy to have each member of our faculty back with us for this school year. Every one has started working hard to make this school year one of the most successful of the Davidson school years.

We are very happy to find that the enrollment for this school year is a bit higher than that of the last school year. In addition to pupils who have entered since the first day of school, other newcomers are expected to enroll soon. We will be very grateful to our parents if they will help to keep their children in school each day and urge that they take advantage of the hot lunch that is served in the school cafeteria each day. There are many more pupils eating this year than last year, but we want each of our pupils to eat daily.

Mr. Gibson and members of the faculty plan to work hand-in-hand with the parents so that we might make our Parent-Teachers Association one of the best in the state. We hope to work together and make much progress this school year.

Mrs. Mary Ella Roberts, Mrs. Edna Mae Crockett and baby of Philadelphia are visiting their mother and grandmother, Mrs. Daisy Smith.
