Let no corrupt communication proceed out of your mouth, but that which is good to the use of edifying, that it may minister grace unto the hearers. Ephesians 4: 29.

Work For The Mayor

As this is written, it would appear that Mayor Garland E. Still, first full-time mayor in the city's history, is devoting a major portion of his time to superintending the work of the city police department.

Few will deny that this superintendence, perhaps, is needed, but many citizens are hopeful that the mayor will soon be able to devote some attention to other categories of city affairs.

One matter in which Mayor Still would have 100 percent public support, and in which he would be rendering a considerable public service, would be in applying whatever pressures available to Queen City Coach Company to follow through on the building of a bus station. Though Queen City has taken the initial required step of purchasing property for the erection of a station, it seems to be following through on the construction of it in a very slow manner. Though Queen City owns a lot, the Kings Mountain bus station still stretches from the city limits to city limits. If the regular channels of mayoral influence don't get results, the Herald would almost be tempted to suggest that Mr. Still direct his circular-writing abilities at the bus companies for a time.

Naturally, there are many other matters which require, first, study and decision, then work.

The Herald and commercial interests are in accord with the Mayor's platform plank to endeavor to bring new industry here. North Carolina does not allow tax rebates nor tax-free provisions, but Kings Mountain does have certain natural advantages which should be able to attract industry. Transportation facilities are excellent and the price of land, at least that desirable for plant sites, is not too high.

First needs, of course, from the city's standpoint are sewage disposal and water line extension. Many wish to see the city embark on a public recreation program, and the City Stadium remains a disgrace to a community of Kings Mountain's size.

All these are tasks to which the mayor and his board of commissioners need to devote their energies and attention.

Our sympathies to the family of Mrs. R. L. Mauney, who died suddenly last Saturday. Though her health had not been of the best in recent months, she had continued to be active in her family duties, in her church and in social affairs, and her death came as a shock, not only to her family, but to the community. Mrs. Mauney was a woman of grace and charm and made Kings Mountain a good citizen for the more than 50 years she lived here.

An official welcome to Dr. William P. Gerberding, new pastor of St. Matthew's Lutheran church. The church has been without a regular pastor for about a year, and courch members who have had similar experience are well aware that the lack of a minister leaves many gaps in the spiritual services of a church.

Pay your city taxes before July 1 and get a two percent discount.

Attend the Legion Junior baseball games. There's no better sport, from the spectator's viewpoint.

Our best bow to Mrs. Helen Neal who has been chosen to participate in "The Free-World Workshop" to be held at Chapel Hill in July.

Better Phone Service

Announcement last week by Ernest Orr, Jr., district manager for Southern Bell Telephone and Telegraph Company, of scheduled dates for service improvements in the between-city category, comes under the designation of good

On August 24, Southern Bell expects to come through on its promise of last year to provide free service between Kings Mountain and Bessemer City both ways (now free from Bessemer to Kings Mountain, but not vice versa).

Probably even better news was the announcement of line additions between Kings Mountain and Shelby and between Kings Mountain and Grover. Shelby-Kings Mountain traffic is quite heavy, and, since free service was granted to residential phones as it had been to business phones, it is not unusual to ring Shelby and get a lines-tied-up report.

Kings Mountain, of course, will not be completely satisfied with its telephone service until Southern Bell installs dial equipment. There are several reasons for this feeling. Some feel that only dial systems gives best service, though technical men say this is a moot point. Others get irked if the busy operators can't get to their signal in less than 30 seconds. They feel dial service would eliminate this factor. But the big majority, knowing that most other cities of larger and smaller size have dial service, want to be up-to-date too.

The additional lines are going to help a lot, and dial service will come eventu-

would be hard going to live without telephone service.

Question Of Size?

How small is too small? And how big is too big?

These are always arguable questions and their answers vary for different institutions, and for different business and commercial concerns. It is generally agreed by many citizens today, for instance, that government is too big. They speak principally about federal government, but they think the state government might be in the same danger.

In a church matter, delegates to the Associate Reformed Presbyterian church answered the size question by a two to one vote last week. The delegates said that church of 30,000 members is not too small to attend to the spiritual needs of its parishioners and to propagate its teachings and beliefs.

News of the decision, finally settling for the moment a question that had been on the books for several years, came as good news to the majority of Kings Mountain members of the A. R. P. church. They wanted to stay as they

The Herald is in agreement with the feeling, on the basic premise that churches, civic clubs, and other religious and service organizations get more done than do similar groups which get too large. An over-sized church or civic club is certain to miss the individual and personal attention to its members on which the work is built, and on which it is de-

Don Whitehead, of the Associated Press, speculates that General MacArthur's Texas trip may be the first round of a grass-roots campaign to sell his Korean war program to the American people. It could also be the first round in a grassroots campaign to win the Republican presidential nomination in 1952. The MacArthur utterances will be most interesting to follow. This time, at least, he will not be contravening military orders when he talks.

London Newspapers

I am indebted to Dr. O. P. Lewis for copies of the April 17th editions of two British newspapers, the conservative Daily Express and the less conservative Daily Mirror. A war-time friend of Col, Lewig sends him copies frequently, he says, and they are very interesting to compare to the big papers familiar to American newspaper readers.

Due to government restric-tions on the purchase of news-print, these London papers are restricted in size to six pages, regular Herald size, or 12 pages tabloid sizzes. This is a far cry from what an American expects for his nickle's worth in the purchase of a paper. Yet the Daily Express, Lord Beaverbrook's paper, has a circula-tic of more than four million.

With limited space, it is amazing to see how much news. even detailed news, gets packed into these thin papers. It is a tribute to the editorial genius of the reporters and the news editors, Obviously, there is no such thing as printing the text of General MacArthur's address (which the New York Times did), nor of printing texts of statements from Kings Mountain office-holders (as the Herald has done). But the London papers do a good job of it in getting the salient news

Big news of the day in Britain on April 17 was the warning by the president of the Board of Trade that a crisis in industry impended unless more sulphur could be obtained from the United States, Both papers mae it the lead of the day, and the Daily Express took the ocagain— that the one way to-relieve all the recurring cri-ses was to throw out the Atlee government and put the Tories back in power.

There was no such thing as full-page advertisements in the London papers, and, in both papers, American products got a play in the advertising lineage. Lifebuoy, which really stops B. O." got 16 inches of front-page space in the Daily Express, and Lustre-Creme Shampoo had 10 inches ly Mirror. The featred mat-tress was not the Beauty Rest, but the Slumberland, who not-ed in the advertisement that Slumberland, Ltd., is bedding manufacturer for the King. Products familiar to local folk which were advertised were Milk of Magnesia tablets, Quaker macaroni, Gillette blue blades, and Parker "51" fountain pens. Men who expect to look good in Britain are supposed to wear DAKS suits, rather than Griffon or Curlee or Hickey-Freeman. The DAKS folk had the biggest advertisement of all, a half-page in the Dally Frences. Daily Express.

I-n
To say that the papers are unhappy about the shortage of newsprint is a mild understatement and the Beaverbrook pa-per mentioned it editorially in the April 17th edition as fol-lows: "The raw material fa-mine is not confined to sul-phur. The crisis is even more acute in newsprint—another commodity in which the Government interfered by cancel-ling contracts made by the newspapers. Unparaled disas-ter does not face British news-papers. It is already with them."

Not only is a great amount of news presented in the many one-paragraph news stories, but a great amount of feature material is also written. Here are a few interesting samples: Under the head "Pyjamas on

"James Stewart, aged four, was taken to hospital last night after being burned at his home in Wharfdale-road, Corby, Northants, when his pyjamies caught fire."

Under the headline "Sausage Au Lait":

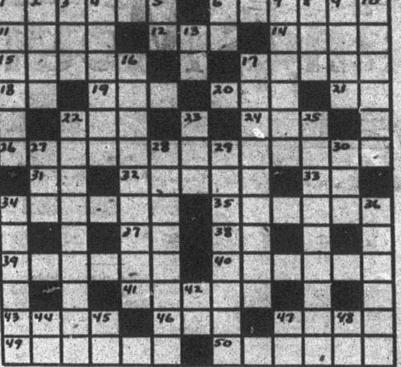

"Six parts of milk powder count as ten parts of meat in a beef sausage, said Mr. Webb yesterday. Six percent of ad-ded powder would mean the meat content might be cut by ten percent. Captain Crook-shank (Tory, Gainsborough) casted: How much mills powde can be put in before a sausage becomes a cream bun?"

Under the headline "What's

in a name!":
"Highly Dangerous lived up
to his name in the Aberlady
Selling Plate at Edinburgh
yesterday. He threw his jockey.
Jimmy Thompson, galloped
round the course, tried to jump
the rails and smashed the

The British love American films. Thus it was not surprising that both papers gave his play to interviews with Eatherine Hepburn.

AN HOUR'S TELEPHONE
SERVICE

Before you decide bargains no longer exist, take a close look at your telephone service. The telephone in your home is on duty day and night at an average charge in North Carolina of less than one-half cent an hour.

Regardless of the time, if somebody needs to get in touch with you—from across the street, across town or across the nation—your telephone can be ringing in a matter of seconds. Then there are the calls you make—to the drug store, the doctor, the hairdreseer, to relatives and friends across town calls that save you tiresome and expensive errands, calls that bring joy and good times, that help keep family ties and friendships

To these every-day calls you make and receive, add the constant protection of your telephone in the event of serious emergency—and we believe you will agree tele-phone service is one of today's biggest

74. Q. Booth

Growing Bargain

The price of telephone service has gone up far less than most things you buy. At the same time the number of telephones you can call at your local rate has nearly tripled in the past ten
