Favorite RECIPES

ROSIES CORNBREAD

Miss Marion Patterson
 1/2 cup sugar (scant)
 1/2 cup shortening
 2 eggs, slightly beaten
 1 cup corn meal
 1 1/4 cups flour
 1/2 tsp. Salt
 3 teaspoons baking powder
 1/2 cup milk

Cream together sugar and shortening. Add the eggs. Sift together meal, flour, salt and baking powder. Add this alternately with milk to the egg mixture. Beat until mixed, but don't beat too long. Pour into a greased square pan and bake in a moderate oven 375 degrees F. about half an hour.

This recipe came from one of Gladys Taker's articles and makes an elegant cornbread. If it is eaten with vegetables the amount of sugar called for could be cut to one or two tablespoons, depending on preference.

PINEAPPLE SHERBET

1 quart milk
 1 cup sugar (pling)
 1 can crushed pineapple (small)
 Juice of 1 1/2 lemons
 Mix and freeze, either in automatic refrigerator or hand turned freezer.

Lost Colony Area Free Of Mosquitoes

MANTEO — Waterside Theatre on Roanoke Island is one of the most mosquito-free places along the North Carolina coast today. That is because officials of "The Lost Colony," America's longest-lived outdoor drama now in its 11th season, recently purchased a jet-type fogging machine.

The fogging machine envelops the Fort Raleigh - Waterside Theatre area with great clouds of DDT each day. The result is death to mosquitoes and many other pesky insects that might otherwise annoy patrons of the drama. Albert Q. Dell in charge of fogging operations also sprays the theatre area with chemicals each day to kill mosquito larvae. Result — an outdoor amphitheatre, the most mosquito free place along the North Atlantic coast.

On the basis of preliminary 1950 census information, there still are more than three-quarters of a million U. S. farms without electric service.

"There have been reports of rumors that no tickets were available unless ordered well in advance," said Hardy, adding, "This is untrue. There are plenty of seats available for *The Lost Colony*. Waterside Theatre can easily accommodate 3,000 persons in comfort an dwith in view of every scene presented on the multilevel 180 feet of staging."

Ever buy a car from this angle?

SURE, a trim new Buick makes a mighty pretty picture when you see it in your driveway, or watch it wheel by.

But if you could get a mechanic's-eye view of this big, broad beauty as it sits on a lift, you'd see an impressive picture of rugged brawn that makes good-to-look-at Buicks give such a good account of themselves on the road.

You'd see the full-length torque-tube drive that firms the whole power relay system, and steadies your going like a giant hand beneath you.

You'd see big sturdy wheels with really wide rims that provide surer footing, give better car control, make tires last longer.

You'd see all four wheels cushioned by stout coil springs that are completely service-free, practically breakproof — and a principal reason for the ever-level Buick ride.

But mainly, you'd see the massive foundation that backbones every Buick —

the deep, wide, X-member frame that's rugged as a rock, and a brute for strength.

So when you look at the beauty of a Buick—the big mileage power of its valve-in-head Fireball Engine—and the moneysaving ability of its Dynaflo Drive*—don't overlook the tough stamina that goes with it all.

And don't overlook the fact that a new '51 Buick, with all its heft, costs less per pound than any other car of comparable size, structure and weight.

Better come see us first chance you get—and find out what a smart buy this is—from every angle.

Equipment, accessories, trim and models are subject to change without notice. *Standard on ROADMASTER, optional at extra cost on other Series.

No other car provides all this:

DYNAFLO DRIVE* • FIREBALL ENGINE • 4-WHEEL COIL SPRINGING DUAL VENTILATION • PUSH-BAR FOREPOINT • TORQUE-TUBE DRIVE WHITE-GLOW INSTRUMENTS • DREAMLINE STYLING • BODY BY FISHER WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM
