FORTUNE TELLER

ORIENT

2 3 4 5 6 7

YOU can have fun figuring out your message from the Orient by use of this pleasant little letter puzzle. If the number of letters in your first name is 5 or less, subtract from 7. If more than 5 letters in your first name, subtract from 11. Now take this result and find your key letter in the word ORIENT at the top of this puzzle. Then, starting at the upper left corner, check each one of your large key letters as it appears from left to right. Below the key letters is a code message for you.

GARDEN TIME

ROBERT SCHMIDT
N.C. STATE COLLEGE

Now that we have had a killing frost, I am about to take up my dahlias roots and place them in storage. The procedure is as follows: I cut off the stem of the plant at the ground. With a spading fork I loosen the clump on all four sides and then work the fork under the clump and lift it out. That's hard on the back but must be done carefully because many varieties have long slender roots which are easily broken at the neck making them worthless. Most of the soil may now be removed from the clump.

Since I have about 100 varieties, I label each clump, attaching a permanent type label to one of the roots. Wooden labels will rot and should not be used. Some growers write the name directly on the root with an indelible pencil.

Good storage conditions are essential. The roots must not freeze nor must they dry out in high temperatures. Forty degrees F. is ideal. I am fortunate in having a good storage room where I have successfully stored the clumps each year. I place the clumps on the dirt floor and cover them with granulated peat moss to a depth of about 4 inches. Another layer of clumps may be arranged on top of the first layer and these in turn covered with peat. I have had no trouble keeping dahlia roots under these conditions. A cellar with a dirt floor or a root cellar could be used in a similar manner. A furnace heated basement, is not very suitable because it is too warm.

Negro 4-H'er Makes Profit On Corn

Corn has proved to be profitable project for Leon Matthews Negro 4-H Club member of the Ware community, Cumberland County.

According to H. A. Johnson, Cumberland Negro farm agent for the State College Extension Service, Leon grew one acre of N. C. 27 hybrid. He planted the crop March 20 in four-foot rows 14 inches in the drill.

The corn followed tobacco rotation. The 4-H member used 600 pounds of 4-10-6 fertilizer at planting and side-dressed with 200 pounds of nitrate of soda. The field was cultivated three times.

Leon's yield was exactly 100 bushels on the one acre. His cost of production was 82 cents per bushel. With his corn valued at \$2 per bushel, the youth's net profit on the project of \$118.

Stretch Clothing Dollars
Bed jacket from old blouse: No need for a pattern for this. Just make sure it is a blouse that fastens down the front.

First rip off the collar and the cuffs, snip off buttons, and remove old color with color remover. Next, color the blouse a lovely linerie shade with just a quick washbowl tinting.

Bind neckline, both sides of front opening, and sleeves with braid, lace, etc.

Make mittens from old sweaters: Use a pattern slightly larger than the hand of owner-to-be. Machine stitch around pattern to outline mitten pieces and prevent raveling. Whipstitch or buttonhole stitch mittens together in contrasting colored yarn.

Make jacket from blanket: A lightweight blanket that has become "thin" in spots is sure to contain plenty of good material for a jacket for the men in your family. Use a pattern for a man's house robe. Make it hip length instead of full length. Dye the portion of the blanket you intend to use before making up the jacket. Follow instructions for dyeing of wool since your blanket will probably be all wool or a wool and rayon mixture.

City Lake Stocked With 500 Blue Gills

Cleveland County Game and Fish Protector Price, of Shelby, supervised the stocking of the City Water lake Nov. 14th with 500 blue gill broam fish. The broam were brought here

To Relieve Misery of

COLDS take 666

LICHTO OR TABLETS - SAME FAST RELIEF

from the state fish hatchery at Table Rock, near Morganton. Some 3,000 other broam were also placed in streams of the county, Wednesday, Mr. Price said, majority in the First Broad river.

Attending the city tag stock- ing were Sam Suber and Sam Davis, along with Mr. Price and two men from the hatchery.

Class To Sponsor Gospel Singing

The senior class of Bethware School will sponsor a gospel singing Friday night, November 23 at 8 o'clock.

The program will feature the Joy Quartet, of Marion, the Duck

worth Trio, of Morganton, and the Twilight Quartet of Kings Mountain. Admission will be 35 and 50 cents.

The proceeds will go to the class trip to Washington, D. C. in the spring.

TELEPHONE SERVICE IS GROWING, TOO

...and the price is up far less than most things you buy!

"GOODNESS, how he's grown!" And you could say the same about telephone service during the short time since his babyhood.

ACTUALLY, in just five years the number of local telephones North Carolinians can call has more than doubled. And this year's increase in North Carolina telephones is expected to reach about 23,000.

BEST OF ALL, this bigger, better "package" of service has gone up in price less than half as much as prices in general... and less than our cost of providing the service.

ALWAYS one of your biggest bargains, telephone service is today an even better buy than it was ten years ago, and a smaller part of your family budget.

H. G. BOOTH, North Carolina Manager

While You Sleep

Let your money earn for you, while you work, at your regular task, and even while you sleep.

Save the building & loan way, either by making regular weekly or monthly payments, by investing in full-paid stock at \$100 per share, or by investing small or large amounts when convenient.

Our current dividend rate is three percent compounded semi-annually.

Small, regular savings have enabled many of your neighbors to own their homes, to educate their children and many of the other desirable things you need.

People build the building and loan way, too.

If you want to build a home, or repair and modernize the one you have, come in to see us for full details.

How to make old roads seem NEW

PICK a road that you know by heart. Not too good a road. One that has some bumps—some unbanked turns—a tough hill or two.

Then get in touch with us, and let us put you behind the wheel of a Buick, with Dynaflo Drive.*

Now you're all set for a new experience. You'll find out this:

Those bumps seem to lose their bobble. You just take them with a smooth and level stride.

Those unbanked turns don't seem so sharp, and those hills seem almost to flatten out.

How come? Well, a lot of things are different when you travel in a Buick.

You're riding on big, soft coil springs that let every wheel dance beneath you, without passing on the jolts to you in the car.

You're driving a car that's plenty inches broader than it is high—a sure-footed road-hugger if there ever was one.

And you're riding behind a Fireball Engine—Buick's time-tested version of a high-compression valve-in-head—engine that packs more power than most people ever need to use.

With this power—and Dynaflo Drive*—you don't have to "rush" a hill at the bottom to soar serenely over the top. You just feed the power as you need it—climb with a sure, steady swoop without buck or bobble all the way up.

There's a lot more that we could tell you about a Buick. But such things as room, and comfort, the confident way it steers, and the way it shortens the miles are things you can best discover from personal experience.

So why not follow the routine already suggested? You supply the road—we'll supply the car—and let it speak for itself.
