Dusters, Sprayers Need Special Care

Because metals for civilian use are in short supply, taking use are in short supply, taking good care of dusting and spray-ing equipment is a "must" for Tar Heel farmers this year. "Successful production of many crops depends upon proper spraying and dusting," points out H. M. Ellis, in charge of ag-ticulural anginaction for the ricultural engineering for the State College Extension Service. "This can't be done unless equipment is kept in good con-dition."

Since corrosion is a major cause of damage to metal, it's very important to clean spray-yers and dusters after using them. Copper and several other materials commonly used to control plant pests react rapidly with some metals, the exten-slon worker explains, and cor-rosion will develop in containers made of these metals if the equipment is not thoroughly washed out with water afterward.

Ellis also points out that combinations of insecticide and fungicide materials are capable of causing corrosion way to prevent damage.

Equipment used to apply 2, 4-D and other weed killers should not be used for other purposes, since no satisfactory weedkilling chemicals from containers and other parts of sprayers has been developed.

In a recent Ohio experiment, a corn field treated chemically to mander, Warren Reynolds, re- a flag." control weeds produced 111 bush minds families of veterans this els per acre. Government and no additional nonetary allowance is made. "In addition, many counties and states also provide burial allowances for veterans. Some of these state laws have indigency clauses.

REMARKS

"The program outlined was adopted by the National Graves Registration and Memorial Committee of The American Legion only after considerable study of various plans in effect. Several conferences were held with a view of benefitting from such experiences.

"The American Legion Nation-al Plan was adopted in 1933. Reclock. markable progress in implement-ing this program has been made. Experience has shown the plan to be practical. To make it 100 per cent operative is the committee's hope. That goal can be achieved with the cooperation of all Legionnaires and all Posts.
