

**State College's HINTS TO HOMEMAKERS**  
Miss Ruth Current  
State Home Demonstration Agent

The more thorough the preparation of the soil in the garden plot the easier it will be to take care of the crops during the growing season. Manure or cover crops should be well turned and cut into the soil. The plowing should not be done when the soil is too wet, especially in clay soils, or the soil may be "cloddy" for the rest of the season. As fine a seed bed as possible should be prepared for the sowing of small seeds.

Most vegetables do best in a soil reaction which is slightly acid—a pH of 6.5. If your soil is lower than a pH 6, enough lime should be added to bring it up to that point. Crops such as Irish potatoes, sweet potatoes, snap beans, tomatoes, watermelons, cabbage, mustard, and corn are quite tolerant of acid soils. On the other hand, such as asparagus, spinach, muskmelon, lettuce, celery, onions, beets, chard, cauliflower, and New Zealand spinach are not tolerant of acid soils and the soil should be brought up to a pH of 6 for these crops.

How deep should seed be planted? That is determined by several factors, of which the most important are size of seed, type of soil, moisture in the soil, and temperature or time of the year. It is sometimes said that seed should be planted to a depth of four times the diameter of the seed. That might not always be an accurate measure, but it is along the right direction. For instance, beans are usually planted from 1 to 1 1/2 inches deep, while turnips are planted about 1-4 inch deep. In clay soils seed should not be planted as deep as in sandy soils. In dry soils seed should be planted deeper than in moist soils. Lastly, in the summer when the soil is warm, seed may be planted deeper than in the spring or fall when the soil is cold.

In any case see that the soil is firmed over the seed. The back of a rake is a good tool for this job. If firms the soil without packing the surface.

**New Booklet Now Available**

L. Y. Ballentine, State Commissioner of Agriculture and chair, man of the North Carolina Board to Farm Organizations and Agencies, announced this week that copies of "North Carolina Accepts the Challenge" are now available for free demonstration.

The booklet, 76 pages in length and illustrated with many charts and photographs, outlines the long-range State agricultural program sponsored by the board.

Commissioner Ballentine said the Publication Department of North Carolina State College is acting as the distribution agency and requests for copies should be addressed to that source.

The first section of "North Carolina Accepts the Challenge" gives the State's present position with respect to farm income, housing, population, crops and livestock, nutrition, medical care schools, roads, telephones, and community life. It presents a two-pronged program design to promote better farming and better living conditions.

A final section suggests how the program can be put into effect. It emphasizes the need for cooperation among all agencies more research, an agricultural program for every county, and a plan for every farm.

The Board of Farm Organizations and Agencies is made up of representatives from the State Department of Agriculture, Department of Conservation and Development, Farm Bureau Federation, Farmers Home Administration, Production and Marketing Administration, Division of Vocational Teaching of the State Department of Public Instruction, Rural Electrification Administration, Soil Conservation Service, State Grange, State College, Experiment Station, and Extension Service.

The first newspaper in the American colonies told its readers, "It is designed that the Country shall be furnished once a month (or if any Glut of Occurrences happen, oftener,) with an account of such considerable things as have arrived unto our Notice."

**ADMINISTRATOR'S NOTICE**  
Having qualified as administrator of the estate of Thomas Newton Harmon, all persons having claims against said estate please file with the undersigned on or before the 6th day of March 1952, or this notice will be pleaded in bar of their recovery.

All persons indebted to said estate please make immediate payment.

This the 6th day of March, 1952.

MARTIN L. HARMON, Jr., Administrator. m-6-a-10

**OUR DEMOCRACY — by Mat**  
**EACH ACCORDING TO HIS FAITH**

AMERICA'S FIRST SUNDAY SCHOOL WAS FOUNDED IN VIRGINIA IN 1785.

TODAY, OUR NATION HAS OVER 215,000 SUNDAY SCHOOLS WITH 25 MILLION PUPILS AND 2 MILLION TEACHERS. IN ADDITION TO THE SPIRITUAL TRAINING IT GIVES, THIS ONE-DAY-IN-SEVEN SCHOOL IS TREMENDOUSLY POTENT IN BUILDING HONOR, FAITH AND MORAL STAMINA INTO THE CHARACTER OF TODAY'S YOUTH—TOMORROW'S CITIZENS.

**ORGANIZE YOUR CLEANING CLOSET**

Every home should have a cleaning closet or a section of a utility closet where all cleaning supplies and equipment may be assembled. Makes cleaning easier, more efficient.

Take out all extra clutter in order to have a safe and sturdy storage closet for mops, iron, ironing board, and all cleaning equipment.

Likewise, cleaning closets should supply disinfectants, furniture waxes, polished floor waxes, cleaning cloths, mop-heads, and scrubbing brushes, pans and pails.

**OATMEAL A SOURCE OF PROTEIN**  
According to the U. S. D. A., "almost one third of the total protein in the food eaten in the United States is furnished by cereal grains." Of these cereals, oatmeal has been proved to offer the best and most economical source of bodybuilding protein. A hot oatmeal breakfast still costs less than a penny a serving and provides an important share of the day's food requirements.

Protein is only one part of oatmeal's nutrition story. Oatmeal is rich in Vitamin B-1 (thiamine) which is necessary for healthy nerves and a normal appetite. It is famous for its rich supply of "blood building" iron and is a good source of ready food energy.

Some foods like oatmeal are multi-purpose foods, furnishing

high amounts of many important nutrients, but not a high proportion of calories. A serving of oatmeal with milk helps supply the other necessary nutrients yet furnishes only 9 per cent of a day's calories. (Cut that to about 6 per cent if you will by eating your oatmeal with skim milk and no sugar).

**Miss Ledford Named Into Fraternity**

Miss Betty Ledford, daughter of Mr. and Mrs. I. W. Ledford, was recently elected into the Gardner-Webb chapter of Sigma Pi Alpha, national honorary language fraternity.

Miss Ledford is a freshman and was a member of the college choir.

James Franklin was the printer for the Boston Gazette, second newspaper in America, started in 1720. William Brooker was the editor.

**Cpl. Allen Returning Home**

WITH THE 7TH INFANTRY DIV. IN KOREA—Cpl. Lawrence L. Allen, son of Mr. and Mrs. Lee Allen, Route 1, Grover, N. C., is returning home under the Army's rotation policy after serving with the 7th Division on the Korean fighting front.

During recent action the division has been probing Communist positions in the mountains north of the 38th parallel. The 7th has been playing a major role in the Korean war since landing at Inchon in September 1950.

Corporal Allen, a veteran of 14 months active duty, is a wireman serving in the 32nd Infantry Regiment and has been awarded the Combat Infantryman Badge and the Korean Service Ribbon with one campaign star, bagged.

**Farmer To Test New Lespedeza**

A demonstration with Rowan lespedeza will be conducted this year on the farm of Fletcher Phair, Negro farmer of Route 1, Atryville.

According to H. A. Johnson, Cumberland Negro farm agent for the State College Extension Service, the Rowan variety will be seeded alongside Kobe lespedeza in the same field. The cultural practices for the two varieties will be the same.

A small area of each plot will be cut for hay and weighed separately, to obtain comparisons on yield. Seed will be harvested from the Rowan variety in case it out-yields the Kobe.

A complete check will be made of the two varieties during the

growing and harvesting period. Phair says he is very much interested in the demonstration, since he is planning a gradual change in his system of farming. At present he is concentrating on row crops, with cotton being his main source of income and tobacco second. He intends to increase his hay and pasture production so a large number of animal units can be fed out on the farm.

**Easter**

Through the ages His Resurrection has been symbolic of the eternal life possessed by Truth and Righteousness, by Peace and Brotherhood. No matter how heavy the threat the coming of Easter uplifts our spirit and creates new Hope, "He is Arisen," comes as an answer to our prayers, telling us that the just cause is His Cause.

It is with especial significance that we go to Church this year to celebrate Easter to hear organ and choir sing hymns to His Praise. More than ever brotherhood is needed. Find it in Church this Sunday.
